Telelogic receives a large license order from leading German communication company

MALMÖ, Sweden, December 21, 2000 – Telelogic AB (Stockholm Stock Exchange: TLOG), the world-leading supplier of solutions for real-time software development, configuration management and requirements management, today announced a deal worth approximately 11 MSEK (\$1.1 million) from a leading German communication company. The order includes licenses for the configuration management tool CM Synergy, recently added to the product portfolio through the Continuus acquisitions. An order for services is likely to follow within short. The licenses will be used for projects related to the automotive industry.

”Telelogic’s acquisition strategy continues to be successful. With the acquisition of Continuus, they got the size and power needed to attract this type of customers. We can offer a complete solution and become an even stronger partner to our key customers, but our products are also very successful on their own.”, says Anders Lidbeck, President and CEO for Telelogic.

About Telelogic

Telelogic is established in thirteen countries under its own name, and a further 20 countries through distributors. It leads the market in development environments for advanced software, especially in real-time applications. By offering high quality graphical development tools and related services, Telelogic makes the development of software more rapid, less labor intensive, and more reliable.

The company has a global client base, including all the top 10 communication suppliers such as Alcatel, Cisco, Ericsson, Fujitsu, Hewlett-Packard, Lucent, Motorola, NEC, Nokia, Nortel Networks and Siemens, as well as a number of leading suppliers within automotive and aerospace.

The software market is moving towards more visual programming methods, and Telelogic leads in the production of the next generation of development tools, in this area. Telelogic is
