TeliaSonera International Carrier offers 40 Gbps Wavelength

TeliaSonera International Carrier is now offering 40 Gbps Wavelength on its existing DWDM network in Europe.

The current market environment is characterized by increased traffic growth driven by new services and applications. Video- and real-time content has become a major bandwidth driver and also high capacity storage area networks requirements are exploding.

The TeliaSonera International Carrier network was specifically designed to carry native 40 Gbps capacity to meet increased capacity demands from its existing and future customer base. This enhanced service will allow the establishment of high bandwidth point-point connectivity and reduce the complexity of managing multiple 10 Gbps Wavelength circuits at a higher cost.

“TeliaSonera International Carrier itself is currently experiencing a dramatic increase in the demand for IP capacity. To improve our current market position and to move towards the corporate vision of being one of the top three global IP carriers by 2010, TeliaSonera International Carrier will now deploy 40Gbps Wavelength to meet the future demand of internal and external network capacity on TeliaSonera International Carrier DWDM platforms,” says Malin Frenning, President TeliaSonera International Carrier.

Forward-Looking Statements

Statements made in the press release relating to future status or circumstances, including future performance and other trend projections are forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There can be no assurance that actual results will not differ materially from those expressed or implied by these forward-looking statements due to many factors, many of which are outside the control of TeliaSonera.

<p>TeliaSonera provides telecommunication services in the Nordic and Baltic countries, the emerging markets of Eurasia, including Russia and Turkey, and in Spain. We are the leading European provider of quality cross-border voice, IP and capacity services, provided through our wholly-owned international carrier network. In 2008, TeliaSonera's net sales amounted to SEK 104 billion, and at the end of December 2008 the total number of subscriptions was 135 million in 20 countries. The TeliaSonera share is listed on NASDAQ OMX Stockholm and NASDAQ OMX Helsinki. Simplicity and service are important tools for us in creating profitable growth and value for our customers and shareholders. Read more at www.teliaSonera.com</p>
