

fg microtec Implements GIPS for HD Voice Quality in New Fixed Mobile Convergence (FMC/UC) Client

***Tier 1 Enterprise Infrastructure Vendor First to Benefit from New Application
that Offers Mobile VoIP on Samsung & HTC Windows Mobile Devices***

SAN FRANCISCO and MUNICH, October 6, 2009 — fg microtec, a leading provider of enterprise unified telephony applications, today announced that their Fixed Mobile Convergence (FMC) Windows Mobile client, will offer voice quality powered by Global IP Solutions' award-winning VoiceEngine™ Mobile.

The fg FMC client lets mobile phone calls move seamlessly from a cellular to Wi-Fi network, creating one telecommunications network. The user continues to use the mobile phone without any changes. As a result, fg microtec's enterprise users can now take their desktop phone with them effortlessly and save mobile costs at the same time.

"GIPS is the clear leader in real-time media processing, which allows us to offer our customers unmatched voice quality," said fg microtec's CEO Robert Mirbaha. "GIPS enabled us to develop a FMC client that offers vastly improved sound quality, which can be a critical differentiator in the competitive mobile market." A Tier 1 enterprise infrastructure vendor will be fg microtec's first customer to benefit from this new application, which offers mobile VoIP.

"The number of Wi-Fi covered areas continues to grow exponentially - in hotels, cafes, corporate offices, home networks and public places. With the fg FMC client, enterprise customers are able to utilize different networks seamlessly, providing the benefit of cost savings and greatly improved voice quality," said GIPS' CEO Emerick Woods. "With GIPS VoiceEngine Mobile, voice quality is

ensured even under strenuous network conditions. It also allows mobile application developers like fg microtec to go-to-market quickly, giving users a sophisticated calling experience, anytime, anywhere and on any IP communication device."

About fg microtec

Founded in 2001, fg microtec has extensive experience in FMC and UC client solutions. fg's corporate solution portfolio covers least cost calling client solutions, Fixed Mobile Convergence / Unified Communications clients (FMC/UC) and Enterprise mobile PBX extensions. fg microtec products combine converged SIP based VoIP solutions on dual and single mode handsets with unprecedented speech quality and stability. fg microtec is dedicated to providing enterprise class applications based on major open standards.
