Cybercom behind Skånemejerier's new intranet

Skånemejerier chose Cybercom to develop the company's new Intranet. The system will be launched in the autumn of 2009. It improves interactivity in the organization and provides better support for the company's work processes.

Skånemejerier is one of Sweden's leading dairies. The Malmö-based company has 600 active milk suppliers in southern Sweden.

"We're very pleased with Cybercom's contribution," says Sara Brynskog, web and PR manager at Skånemejerier. "Our vision is to be more interactive with our co-workers. This new solution provides us with a modern Intranet customised for our organization and its activities."

In the new Intranet implementation, Cybercom migrated Skånemejerier's quality and environmental documents (ISO) to a single platform, and created support for large projects via a document and project management solution. The platform provides a long-term, scalable solution and adds potential for future interactive functionality.

"We focused on finding the best possible solution for Skånemejerier through very effective customer-supplier teamwork," says Fredrik Nilsson, account manager at Cybercom. "The solution is based on Microsoft Windows SharePoint Services (WSS 3.0). By choosing a common platform for the various functions, we were able to highly integrate the operations and make it possible to move transparently between the various subsystems."

"We were aware from the start that we had complex requirements," said Jan Lindskog, IT manager at Skånemejerier. "We're very impressed with how purposefully Cybercom successfully delivered a solution that meets our expectations."
