

Scania Interim Report January-September 2009

- Operating income fell to SEK 1,042 m. (10,455) and earnings per share fell to SEK 0.38 (9.21)
- Net sales decreased by 34 percent to SEK 43,714 m. (66,319)
- Cash flow amounted to SEK 3,017 m. (3,638) in Vehicles and Services

Comments by Leif Östling, President and CEO

"Scania's operating income totalled SEK 1,042 m. during the first nine months of 2009. Vehicle deliveries decreased by nearly 50 percent and were the main explanation for the earnings downturn. More stable service revenue limited the drop in earnings, volume decreased somewhat more than 10 percent. Currency hedgings more than offset the positive effect of the weaker Swedish krona. The Group's earnings were favourably affected by the steps taken to lower the cost level. Cash flow was positive in Vehicles and Services and together with the reduced portfolio in Financial Services, the Group's net debt decreased by SEK 7.7 billion including the dividend payment of SEK 2 billion. Scania launched two new products during the autumn. The new R-series, featuring better fuel economy and an improved driver environment, will ensure Scania's leading position in the important long-haulage truck segment. The new coach model, the Scania Touring, is a major step in Scania's strategy of increasing the degree of industrialisation and expanding its service range related to complete buses and coaches. The European truck market is characterised by low economic activity, but in Scania's judgement the downturn in western European demand has now levelled off. In Latin America, demand remains relatively good. In Asia, a certain recovery is under way. The market for buses and coaches was generally more stable during the period. The market for engines has noted a sharp downturn. However, some recovery is occurring in the industrial engine segment. Scania is continuing its efforts to reduce costs and sustain cash flow. In June, the company introduced a four-day week for about 12,000 employees in Sweden, a saving of more than SEK 300 m. during 2009. Scania's strengthened product portfolio together with the large-scale cost-saving measures and its investment in employee training have created good conditions for profitable growth when the market turns around."

Business overview

Vehicles and Services

Total deliveries declined during the first nine months of 2009 by 47 percent to 29,690 (55,818) vehicles, compared to the same period of 2008. Net sales fell by 34 percent to SEK 43,714 m. Currency rate effects excluding currency hedges had a positive impact of 9 percent.

Order bookings declined by 49 percent to 24,918 (48,611) vehicles, compared to the first nine months of 2008.

During the third quarter, deliveries were down by 44 percent and net sales fell by 34 percent to SEK 13,426 m. Currency rate effects excluding currency hedges had a positive impact of 6 percent. Order bookings decreased by 6 percent to 10,634 (11,356) vehicles, compared to the third quarter of 2008.

Scania launched two new products during the autumn. The new R-series, featuring better fuel economy and an improved driver environment, will ensure Scania's leading position in the important

long-haulage truck segment. Combined with Scania Driver Support, which is a new system that gives professional drivers real-time feedback and tips on how to refine their driving style, fuel consumption can be further reduced.

The new coach model, the Scania Touring, is a major step in Scania's strategy of increasing the degree of industrialisation in production and expanding its service offering related to complete buses and coaches. The coach will be built in collaboration with Chinese bus bodybuilder Higer. Higer is responsible for the bodybuilding expertise and Scania is providing the chassis, which will ensure a quality product and cost-effective production. Scania began its partnership with Higer five years ago. With the Scania Touring, customers can be offered a one-stop shopping concept, with parts and servicing support provided by Scania's global network.

Scania is continuing its efforts to adjust the cost level in the organisation. A total of more than 4,100 employees have left the Group since September 2008, which includes both temporary and permanent employees. In addition, Scania has introduced reduced working hours in a number of European countries. In Sweden, starting in June the company introduced a four-day week for about 12,000 employees, with a pay reduction of 10 percent. The total cost saving in Sweden during the period until the end of 2009 is estimated at more than SEK 300 m.

In its efforts to reduce costs and boost operational efficiency, Scania's aim is to preserve core competency. During the first half of 2009, Scania carried out a training programme for about 8,000 employees at its European production units.

Trucks

European truck markets are characterised by low economic activity. In many European markets, the truck population has a relatively low average age, and transport companies also generally have overcapacity. This has sharply slowed investments in new vehicles. However, in Scania's judgement the downturn in western European truck demand has now levelled off. In Latin America, demand remains relatively good, especially in Brazil. In Asia, a degree of recovery is under way, for example in the mining segment.

Sales of used trucks increased gradually during the period and volume was 30 percent higher in the third quarter, compared to the third quarter last year. As a result, the level of used truck inventories has stabilised. New truck inventory levels have normalised in all major markets except Russia.

Scania's truck **deliveries** declined by 50 percent to a total of 25,179 (50,570) during the first nine months of 2009, compared to the same period of last year. In western Europe, deliveries fell by 53 percent due to downturns in all markets. In central and eastern Europe, deliveries fell by 81 percent; the downturn was attributable to all markets, especially Russia and Poland.

Deliveries in Latin America decreased by 22 percent with a general downturn in most markets.

In Asia, the downturn was attributable to most markets, especially Turkey. In other markets, deliveries were higher due to a number of large spot orders in some of the African markets.

During the third quarter, deliveries were down by 48 percent.

Scania's **order bookings** during the first nine months of 2009 amounted to 20,696 (43,275) trucks, a decrease of 52 percent. In western Europe, order bookings declined by 56 percent to 7,871 (17,763) units. In central and eastern Europe, order bookings were down by 82 percent to 1,461 (8,138) trucks during the period. In Latin America, order bookings decreased by 29 percent during the first nine months, while order bookings in Asia fell by 46 percent.

In the third quarter, Scania's order bookings fell by 9 percent. Order bookings stabilised in western Europe, where the decrease was limited to 2 percent and higher demand was noted in the Nordic countries and Great Britain. Compared to the second quarter of 2009, total truck order bookings increased by 30 percent and surpassed the level of deliveries.

Net sales of trucks fell by 44 percent to SEK 23,011 m. (41,436) during the first nine months of 2009. During the third quarter, sales decreased by 46 percent to SEK 6,487 m.

The total market for heavy trucks in 25 of the European Union member countries (all EU countries except Greece and Malta) plus Norway and Switzerland fell by 49 percent to about 128,500 units during the first nine months of 2009. Scania truck registrations amounted to

Buses and coaches

The bus and coach market has generally been more stable than the truck market during the period. Scania's **order bookings** for buses and coaches fell by 21 percent to 4,222 (5,336) units during the first nine months.

some 16,900 units, equivalent to a market share of about 13.2 (12.9) percent.

In Europe, demand was down 28 percent compared to the same period of 2008. In western Europe, demand fell mainly in Italy and Spain. In central and eastern Europe, Scania noted a significant downturn in most markets, especially in Russia.

In Latin America, order bookings fell by 35 percent during the first nine months. Order bookings were lower in most markets. In Asia and other markets, order bookings decreased by 4 percent during the same period.

During the third quarter, order bookings rose by 14 percent.

Scania's bus and coach **deliveries** totalled 4,511 (5,248) units during the first nine months of 2009. In Europe, deliveries fell by 22 percent to 1,451 units; the downturn was mainly attributable to Italy, Spain, Russia and Poland. The downturn in Latin America was related to most markets, especially Brazil. In Asia and other markets, deliveries rose 19 percent.

Net sales of buses and coaches increased by 8 percent to SEK 6,204 m. (5,759).

During the third quarter, deliveries fell by 18 percent to 1,462 units and net sales decreased by 9 percent.

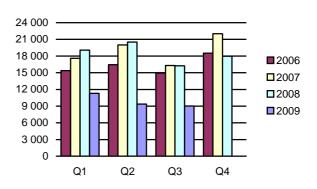

Engines

The market for engines experienced a downturn similar to that of the truck market. All segments power generation, industrial and marine - were affected by the downturn in economic activity. Some recovery is occurring, however, in the industrial engine segment due to inventory reductions by original equipment manufacturers (OEMs). Scania's engine concept for the next stage of emission standards, which will go into effect in the industrial segment from 2011, has been well received by the market, and the company has signed agreements with sizeable OEMs. Scania's strategy is to increase its sales in the industrial segment, where demand is characterised by high quality and performance standards, while successfully meeting the strictest emission requirements. Order bookings for engines declined by 46 percent to 2,886 (5,383) units during the first nine months of 2009. In the third quarter, order bookings increased by 48 percent to 1,559 units.

Vehicles delivered (units)

Net sales (SEK m.)

Operating income (SEK m.)

Engine deliveries fell by 48 percent to 2,619 (5,080) units during the first nine months, and net sales decreased by 39 percent to SEK 533 m. (867). During the third quarter, deliveries fell by 48 percent to 865 units and net sales fell to SEK 172 m.

Services

Service revenue was essentially unchanged at SEK 11,954 m. (12,078) during the first nine months of 2009. Demand for transport services fell during the period, resulting in a volume decrease of somewhat more than 10 percent. The lower volume was offset by positive currency rate effects of 9 percent and somewhat higher prices. Besides adjusting the service organisation to lower demand, Scania is focusing on boosting the efficiency and capacity utilisation of workshops.

Earnings

Vehicles and Services

Operating income in Vehicles and Services totalled SEK 1,124 m. (10,089) during the first nine months of 2009. A decline in vehicle deliveries and lower capacity utilisation had an adverse impact on earnings. Measures to lower the cost level had a positive effect. Scania's research and development expenditures amounted to SEK 2,407 m. (2,829). After adjusting for SEK 216 m. (127) in capitalised expenditures and SEK 223 m. (354) in depreciation of previously capitalised expenditures, recognised expenses decreased by SEK 642 m. to SEK 2,414 m. (3,056). The reduction in expenses was mainly attributable to lower project costs.

Compared to the first nine months of 2008, currency spot rate effects amounted to some SEK 1,385 m. Currency hedging income amounted to about SEK -2,020 m. During the first nine months of 2008, the impact of currency hedgings on income was about SEK 85 m. The total currency rate effect was thus some SEK -720 m.

During the third quarter, operating income totalled SEK 588 m. (2,736). Low vehicle deliveries, low capacity utilisation and – to some extent – lower prices related to inventory reduction adversely impacted earnings. Measures to lower the cost level had a positive effect. Compared to the second quarter of 2009, capacity utilisation in production improved, resulting in higher operating income despite lower volume. Scania's research and development expenditures amounted to SEK 714 m. (877). After adjusting for SEK 82 m. (62) in capitalised expenditures and SEK 38 m. (118) in depreciation of previously capitalised expenditures, recognised expenses decreased by SEK 263 m. to SEK 670 m. (933).

Compared to the third quarter of 2008, currency spot rate effects amounted to SEK 10 m. Currency hedging income amounted to about SEK -385 m. During the third quarter of 2008, the impact of currency hedgings on income was about SEK -15 m. The total currency rate effect was thus some SEK -360 m.

Financial Services

At the end of the third quarter, the size of Scania's customer finance portfolio amounted to SEK 40,951 m., which represented a downturn of SEK 6,269 m. since the end of 2008. In local currencies, the portfolio decreased by 10 percent, equivalent to SEK 4,639 m.

The penetration rate was 44 (34) percent on a rolling twelve-month basis in those markets where Scania has its own financing operations.

Operating income in Financial Services amounted to SEK -82 m. (366) during the first nine months. The positive effects of an increased average portfolio were offset by higher bad debt expenses, compared to the first nine months of 2008. Hauliers have been affected by the decreasing demand for transport services, which has led to lower volume and pressure on freight prices. As a consequence, the number of delayed payments rose during the period, mainly in markets outside western Europe. The number of rescheduled contracts and repossessions of vehicles has increased. Higher bad debt expenses were mainly attributable to central and eastern Europe. Operating income in the third quarter decreased to SEK -69 m. (84).

Scania Group

Scania's operating income amounted to SEK 1,042 m. (10,455) in the first nine months. Operating margin fell to 2.4 (15.8) percent. Scania's net financial items amounted to SEK -676 m. (-185). Net interest items

amounted to SEK -583 m. (-202), adversely impacted by a higher average net debt position in Vehicles and Services than during the same period of last year. There was also a negative effect from the increased cost for funding of working capital in countries with relatively high interest rates. Other financial income and expenses totalled SEK -93 m. (17). This included SEK -61 m. (21) related to the use of fair value in the valuation of financial instruments where hedge accounting was not applied.

The Scania Group's tax expense amounted to SEK 59 m. (2,901). Net income for the period amounted to SEK 307 m. (7,369), corresponding to a net margin of 0.7 (11.1) percent. Earnings per share amounted to SEK 0.38 (9.21).

Cash flow

Vehicles and Services

Scania's cash flow in Vehicles and Services amounted to SEK 3,017 m. (3,638) during the first nine months of 2009. Tied-up working capital decreased by SEK 3,765 m., mainly due to lower volume and inventory reduction.

Net investments amounted to SEK 2,380 m. (3,642), including SEK 216 m. (127) in capitalisation of development expenses. The gradual downturn was related to a slower pace of capital spending and was partly due to postponed investments. Net investments were affected by acquisitions of SEK 6 m. The first nine months of last year were affected by divested operations totalling SEK 59. At the end of the third quarter of 2009, the net debt position amounted to SEK 6,327 m., compared to SEK 8,364 m. at the end of 2008. The net debt position was affected by the dividend payment of SEK 2,000 m. during the second quarter.

During the third quarter, cash flow amounted to SEK 1,109 m. (794).

Scania Group

Scania's cash flow in Financial Services amounted to SEK 4,365 m. (-2,487) during the first nine months of 2009, due to a reduced customer finance portfolio. Together with the positive cash flow in Vehicles and Services, this reduced the Group's net debt by about SEK 7.7 billion compared to the end of 2008.

Parent Company

The assets of the Parent Company, Scania AB, consist of shares in Scania CV AB. Scania CV AB is the parent company of the Group that comprises all production and sales and service companies as well as other companies. Scania AB reported an income before taxes of SEK 3 m. (127).

Miscellaneous

Number of employees

The number of employees at the end of the third quarter was 32,085, compared to 36,226 on the same date in 2008. From year-end 2008 to the end of September, the total number of employees in the Scania Group decreased by 2,692. Production and corporate units decreased their number of employees by 1,713 to 14,452 and Research and Development by 284 to 2,638. Sales and service companies reduced their number of employees by 716 to 14,462.

Material risks and uncertainty factors

The section entitled "Risks and risk management" in Scania's Annual Report for 2008 describes Scania's strategic, operative, legal and financial risks. Note 2 of the same report provides a detailed account of key judgements and estimates. Note 30 of the same report describes the financial risks, such as currency risk and interest rate risk. The risks that have the greatest impact on financial performance and on reporting for the Group and the Parent Company are summarised as follows:

a) Sales with obligations

About 10 percent of the vehicles Scania sells are delivered with residual value obligations or repurchase obligations. These are recognised as operating lease contracts, with the consequence that recognition of revenue and earnings is allocated over the life of the obligation (contract). Major changes in the market

value of used vehicles thus affect Scania's successive income recognition. In case the as-yet-unrecognised profit on a sold vehicle does not cover the effects of a possible downturn in market value, a provision in the required amount is made. At the end of the third quarter of 2009, obligations related to residual values or repurchase amounted to SEK 6,189 m., compared to SEK 6,819 m. at the end of 2008.

b) Credit risks

In its Financial Service operations, Scania has an exposure in the form of contractual future payments. This exposure is reduced by the collateral Scania has in the form of the right to repossess the underlying vehicle. In case the market value of the collateral does not cover the exposure to the customer, Scania runs a credit risk. Reserves for probable losses in Financial Services operations are set aside in the estimated amounts required.

c) Refinancing risk

Refinancing risk is the risk of not being able to meet the need for future funding. Scania applies a conservative policy concerning refinancing risk. For Vehicles and Services, there shall be a liquidity reserve consisting of available cash and cash equivalents as well as unutilised credit facilities which exceeds the funding needs of the Scania Group, excluding Financial Services, for the next two years. For Financial Services, there shall be dedicated funding that covers the estimated demand for funding during the next year. There shall also always be borrowings that safeguard the refinancing of the existing portfolio. Controlling Scania's refinancing risk includes safeguarding access to credit facilities and ensuring that the maturity structure of borrowings is diversified.

As of 30 September 2009, Scania had unutilised credit facilities of some SEK 25,500 m., compared to about SEK 26,900 m. on 31 December 2008. Excluding current rate effects, these credit facilities are unchanged compared to year-end 2008.

Accounting principles

Scania applies International Financial Reporting Standards (IFRSs) as adopted by the EU. The Interim Report of the Scania Group is prepared in accordance with IAS 34, "Interim Financial Reporting," and the Annual Accounts Act. New accounting standards being applied starting on 1 January 2009 are as follows:

Revised IAS 1, "Presentation of Financial Statements" – The revision contains a new financial reporting structure and requires a company to provide a statement of comprehensive income that includes all changes in assets and liabilities that are not due to transactions with its owners. Changes that were previously recognised directly in equity in the statement of recognised income and expense are now recognised in the statement of comprehensive income. Scania has chosen to present its statement of comprehensive income in one table.

IFRS 8, "Operating Segments" – This standard replaces the previous standard IAS 14, "Segment Reporting". IFRS 8 has not resulted in a changed definition of Scania's segments.

Revised IAS 23, "Borrowing Costs" – Scania has previously expensed borrowing costs in the period when they arose. The revision in IAS 23 means that borrowing costs shall be included in the cost of assets that take a substantial period of time to get ready for their intended use or sale. The standard will be applied to projects that begin after 1 January 2009 and has not resulted in any substantial effect on Scania's financial reports.

Otherwise the accounting principles and calculation methods are unchanged from those applied in the Annual Report for 2008.

The Interim Report for the Parent Company, Scania AB, is prepared in accordance with the Annual Accounts Act and recommendation RFR 2.2, "Accounting for Legal Entities".

Material changes in ownership

In January 2009, Porsche Automobil Holding SE announced that the company had increased its holding to 50.8 percent in Volkswagen AG, which means that Porsche indirectly controls Scania. In compliance with Swedish law, Porsche therefore presented a mandatory offer for Scania of SEK 68.52 in cash for each Series A share and SEK 67.10 in cash for each Series B share. Scania's Board of Directors recommended to shareholders not to accept Porsche's mandatory offer. Shareholders equivalent to 7.93 percent of share capital and 2.34 percent of voting power accepted the offer, and Porsche sold these shares onward to

Volkswagen. Volkswagen's holding in Scania, including shares managed by credit institutions, thereby amounted to 49.29 percent of share capital and 71.81 percent of voting power.

Dividend

Scania's Annual General Meeting on Thursday, 7 May 2009 approved a dividend of SEK 2.50 per share for 2008. A total of SEK 2,000 m. was transferred to the shareholders.

Annual General Meeting

Scania's Annual General Meeting will be held on Thursday, 6 May 2010 in Södertälje, Sweden.

Södertälje, 26 October 2009

Leif Östling
President and CEO

Financial information from Scania

Scania's Year-end Report for 2009 will be published on 3 February 2010.

This report contains forward-looking statements that reflect management's current views with respect to certain future events and potential financial performance. Such forward-looking statements involve risks and uncertainties that could significantly alter potential results. These statements are based on certain assumptions, including assumptions related to general economic and financial conditions in the company's markets and levels of demand for the company's products.

This report does not imply that the company has undertaken to revise these forward-looking statements, beyond what is required by the rule book for issuers at the NASDAQ OMX Nordic Exchange Stockholm, if and when circumstances arise that will lead to changes compared to the date when these statements were issued.

The Interim Report for January-June 2009 stated the following:

"During the seasonally weak third quarter, Scania foresees a continued low level of demand. The successful inventory reduction in Scania's major markets, together with higher order bookings in the second quarter than in the first quarter, will lead to a higher daily production rate than in the second quarter."
