KEY DEVELOPMENTS DURING THE YEAR

ReadSoft enjoyed a strong year in 2005, during which sales continued to grow in all its geographic regions. The segment "the United States and the rest of the world" showed a very positive development, generating growth of 31%.

The ReadSoft DOCUMENTS for Invoices software obtained 200 new customers during the year, bringing the total number of users to 1,200. Among the new customers was one of the world's biggest pharmaceutical companies, which signed an agreement – worth SEK 30 million over several years – for installations in more than 100 countries. Commerzbank, one of the biggest German banks, chose document automation by ReadSoft to handle half a million invoices per year. ReadSoft delivers its SAP-certified solution in cooperation with Ebydos, its global SAP partner. Vodafone's central service centre for Australia and New Zealand purchased and installed an Oracle-integrated solution consisting of ReadSoft DOCUMENTS for Invoices and InvoiceIT by ReadSoft Consit AS (formerly Consit Development). Among ReadSoft's other new customers were Leroy Merlin, Portugal telecom, FöreningsSparbanken Finans, BBC, Optimera and Visma.

Sales of ReadSoft DOCUMENTS for Forms also experienced solid growth during the year. The biggest agreement for the product was in the United States, where a government agency invested more than SEK 8 million. Laos also used the software from ReadSoft in connection with a census of its six million inhabitants. Karolinska University Hospital in Stockholm purchased the software to read more than 18 million of its medical documents each year. Among the 100 new customers that bought ReadSoft DOCUMENTS for Forms during the year were the British Chamber of Commerce and the Statistics Department of Malaysia. ReadSoft now has more than 3,100 customers that use the software.

In early 2005, ReadSoft acquired a 50% stake in ReadSoft Consit in Denmark. The acquisition represented an additional step for ReadSoft into the world of Oracle, offering direct access to the software and associated expertise. That enables effective use of ReadSoft's products for electronic document management in Oracle e-Business Suite. Oracle's certification of the InvoiceIT invoicing software ensures 100% compatibility with Oracle e-Business Suite. The certification further strengthens ReadSoft and ReadSoft Consit in the market for electronic invoicing solutions.

ACCOUNTING POLICY AND TRANSITION TO IFRS

As of January 1, 2005, all public traded companies within the European Union will comply with the accounting policies of International Financial Reporting Standards (IFRS) as approved by the European Union in 2002. Therefore this interim report is presented in accordance with the IAS 34 Interim Reporting. The transition to IFRS has not substantially altered the accounting policies of the company compared to the annual report of 2004. The transition alterations have had no impact on the group's Opening Balance on January 1, 2005. A detailed description of the accounting policies for ReadSoft are to be found in the upcoming annual report. With regard to IAS 19 concerning reimbursements to employees, ReadSoft has pension obligations which in part are benefit-governed pension plans that involve several employers. At the time of writing, there is not enough information available from the other pension providers, so the plan cannot be presented as benefit-governed. Instead it is presented as a fee-determined plan, in accordance with a statement from FAR. The company estimates that presenting the insurance plan as a benefit-determined plan would not have greatly affected the balance sheet of the group or the parent company.

GOING FORWARD

ReadSoft posted solid growth in most markets and substantially higher Group earnings in 2005. Its key revenue from license sales and maintenance agreements was up by more than 18%, which represented growth fully in line with ReadSoft's long-term targets. The company's goal is to continue growing internationally while expanding its business in important markets such as Germany, France, the United Kingdom and the United States. Demand for ReadSoft's products is being driven by the greater need for lower costs, cost-effectiveness and financial control, all of which is likely to continue boosting ReadSoft's short-term and long-term growth.
