

## **Semcon evaluates Icomera's new technology for wireless Internet**

*Semcon signs an agreement with Icomera AB concerning the evaluation of a completely new, unique, technology in the form of a gateway solution that Icomera has developed. The technology will be used to improve existing and future solutions for wireless data communication. The agreement strengthens Semcon's involvement in the telecom sector, with the focus on mobile Internet.*

Icomera is a software company within wireless data communication that has developed a unique technology, creating a Virtual Wireless Network, which dramatically improves upon existing and future wireless data communication solutions. The agreement means that Semcon will evaluate the technology and its benefits for mobile Internet, including greater mobile bandwidth, a more stable wireless connection and the opportunity to switch between networks without breaking the connection.

"In order to deliver a truly viable wireless data communication solution, every aspect of it needs to be evaluated. We believe that Semcon's experience and know-how will be of great value to our products' future success," says Kristian Axelsson, CEO of Icomera AB.

Lars-Inge Sjöquist, Vice President of Semcon Sweden AB, comments: "Today, we are seeing dramatic advancement in the telecom sector. At Semcon we understand the demands that will be placed on existing and emerging wireless technologies. It is therefore important for Semcon to build partnerships with pioneering companies such as Icomera, to retain our strong position within wireless data communication solutions. Our investment in knowledge of wireless data communication, coupled with our technical competence, ensures that we will continue to deliver innovative mobile Internet solutions to our customers."

Semcon is a market leader within technical information in the Nordic region, where the Internet and multimedia are gaining in prominence. Operations are conducted primarily on a consultancy basis, although an increasing number of customers are outsourcing all production of technical information to Semcon. Semcon's outsourcing concept is unique, improving efficiency and delivering cost benefits for customers. Semcon's vision is to be a world leader within interactive technical information.
