SCANIA INTERIM REPORT - JANUARY- MARCH 2001

"Operating income for Scania products was SEK 943 m., a decrease of 10 percent. The slowdown in western European demand that I predicted earlier has intensified. Scania has initiated a cost adjustment in its European operations and the efficiency-raising programme in Latin America is continuing," says Leif Östling, President and CEO.

FIRST QUARTER IN BRIEF

| Units | Q1 2001 USD m.* | Q1 2001 | Q1 2000 | % |

¹Beginning with the first quarter of 2001, the Scania Group is applying the new recommendation RR 11 of the Swedish Financial Accounting Standards Council on revenue recognition. See page 6.

SCANIA, FIRST QUARTER OF 2001 – COMMENTS BY THE PRESIDENT AND CEO

"The Scania Group's operating income for the first quarter of 2001 was SEK 952 m. Operating income for Scania products – excluding passenger car operations – was SEK 943 m., a decrease of 10 percent compared to the same period of 2000. Currency rate effects, inclusive of hedging activities, had a positive effect of around SEK 150 m. in European operations. Truck deliveries decreased by 17 percent in western Europe, while sales of service-related products increased by 18 percent. Volume growth continued in customer finance operations. Passenger car operations, mainly in the form of Volkswagen products, showed weak operating income of SEK 9 m., or SEK 47 m. worse than the corresponding quarter of last year," Mr Östling notes.

"The slowdown in western European demand that I predicted earlier has recently intensified even more. In the past month, macroeconomic forecasts for western Europe have been revised downward substantially, and uncertainty has increased significantly concerning growth during the second half of this year. Transport volume is directly related to economic developments. This means that, generally speaking, activity in the transport industry has entered a calmer phase.

"The rapid growth of recent years in the western European heavy truck market ended during the second half of 2000. Throughout this expansive period, Scania was able to maintain constant delivery times, around three months, thanks to the flexibility we have built into our production system. As a result, the decrease in order bookings affected us quickly, since the orderbook has been short. The pace of deliveries has therefore fallen. In various markets this has led to a decrease in our market share. Scania's market share fell to 14.5 percent in western Europe. Several of our competitors have had longer orderbooks, which are now being delivered. Smaller haulage firms, traditionally Scania's largest customer category, are quickly affected by a transport market slowdown and then postpone their capital spending. In contrast, larger transport companies see opportunities to make purchases on favourable terms in a depressed new-truck market. We have abstained from some of these transactions, since we felt that the price levels could not be justified.

"In central and eastern Europe, order bookings rose by 32 percent and in Asia by 31 percent.

"As early as October last year, we made a decision to begin adjusting the staffing in our European production organisation to a clearly lower demand level. By year-end 2001, the number of production employees will be about 1,200 lower. We are accomplishing this mainly by not renewing time-limited employment contracts. We have also begun a review of the number of employees in other staff categories, in order to adjust staffing levels there as well. These measures will yield a gradual effect during the year.

"During January, the shareholders of Beers accepted the offer that Scania had made for the remaining 50 percent of the shares in Beers NV, which has been our distributor in the Netherlands for more than 50 years. Now that Beers is wholly owned by Scania, we will begin a restructuring of our Continental European sales and service organisation in order to make it more efficient and provide even better service to our customers.

"The trend of earnings in Latin America during the first quarter is a disappointment. The need to continue streamlining of operations is clear, above all by further nationalising a portion of component purchases. A number of external factors have also affected the trend of earnings. The political crisis in Argentina has had economic repercussions in Brazil as well, where the currency depreciated by more than 10 percent during the first quarter. As a result, the price level in Brazil, measured in US dollars, is clearly too low. We are therefore now gradually adjusting our prices upward. Early this year, Scania acquired portions of the Battistella Group, its largest distributor chain in Brazil.

"Order bookings in bus and coach operations were largely unchanged. A cost adjustment programme is also underway in bus and coach operations. It covers both products and production systems, and the aim is to achieve the same operating margin for buses as for trucks.

"Industrial and marine engine operations developed favourably.

"The 16-litre V8 engine introduced last year is now in full production and the feedback from our customers is very positive. During January we introduced a 470 horsepower turbocompound version of our six-cylinder 12-litre engine. We will gradually be able to produce it in larger quantities during the year. With these engines, we have greatly strengthened our competitiveness in our upper segment, the most prestigious and profitable.

Passenger car operations showed a clear decline in operating income. The main reason for this was sharply lower car sales in Sweden. The market is expected to decrease by 10 to 15 percent compared to last year.

"It was not possible to fully offset the effects of shrinking demand for heavy trucks in western Europe with volume increases in other markets, higher local-currency revenue per vehicle sold and a weaker Swedish krona. Scania has initiated a cost adjustment in its European operations and the efficiencyraising programme in Latin America is continuing. However, we expect lower earnings this year compared to last year." Mr Östling concludes.

SCANIA INTERIM REPORT - JANUARY- MARCH 2001

THE MARKET

The slowdown in order bookings that began during the third quarter of 2000 continued, and the pace of order bookings is now at its 1998 level. Scania's market share in western Europe amounted to 14.5 (15.7) percent.

The slowdown in demand had a quick impact, since the flexibility in Scania's customer ordercontrolled production system has kept the order backlog at a constant low level over the past three years. Mainly in Great Britain and the Netherlands, Scania has abstained from certain sales transactions due to low price levels to large customers.

In central and eastern Europe as well as in Asia, order bookings continued to rise.

Scania's order bookings in Latin America climbed by 19 percent during the first quarter. Its market share in Brazil improved to 29.1 (27.6) percent.

Order bookings for buses and coaches in European and Latin American operations were unchanged.

Delivered volume of industrial and marine engines rose to 760 (712).

Sales of **service-related products**, mainly in the form of parts and workshop services, rose by 18 percent to SEK 2,408 m. (2,047). Excluding acquisitions, the increase amounted to 7 percent.

Number of Scania truck registrations, January-March

Scania's market shares

| January-March, p | ercent | |
|------------------|--------|------|
| | 2001 | 2000 |
| France | 10.8 | 10.6 |
| Great Britain | 18.3 | 21.9 |
| Brazil | 29.1 | 27.6 |
| Germany | 8.0 | 9.4 |
| Italy | 14.7 | 12.1 |
| Spain | 12.8 | 15.0 |
| The Netherlands | 20.0 | 22.7 |
| Belgium | 19.1 | 19.1 |
| Sweden | 43.7 | 52.0 |
| Austria | 16.5 | 16.6 |
| | | |
| Western Europe | 14.5 | 15.7 |

The customer finance portfolio grew by SEK 4,239 m. (23 percent) during the first quarter to SEK 22,761 m., of which about SEK 3,000 m. was attributable to the acquisition of Beers.

SALES AND EARNINGS

Beginning with the first quarter of 2001, the Scania Group is applying the new recommendation RR 11 of the Swedish Financial Accounting Standards Council on revenue recognition. See page 6.

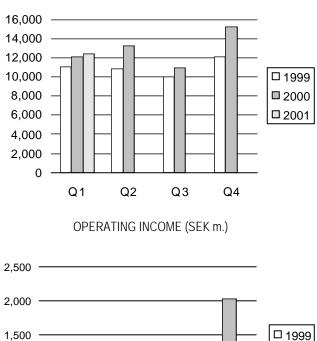

Scania Group **unit deliveries during the first quarter** amounted to 11,727 (13,006) trucks and buses, a decrease of 10 percent. In monetary terms, **sales** rose by 3 percent to SEK 12,405 m. (12,050). Sales of Scania products rose by 7 percent.

The Scania Group's **operating income** amounted to SEK 952 m. (1,105), equivalent to a margin of 7.7 (9.2) percent. The operating margin for Scania products was 8.5 (10.1) percent.

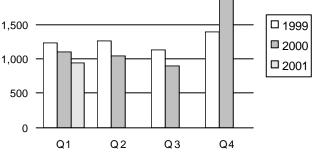

Operating income in European operations² fell by 12 percent to SEK 994 m. (1,133) during the first guarter.

Earnings were favourably influenced by:

 a net amount of SEK 150 m. due to a weaker Swedish krona, even though a large portion of the currency flow had been hedged in advance. Excluding the effects of currency hedging, operating income would have been about another SEK 250 m. higher.

SALES (SEK m.)

- higher average revenue per vehicle in local-currency terms.
- larger sales of service-related products.

This was offset by:

- lower sales volume in the western European market.
- R&D expenses more than SEK 100 m. higher than the year-earlier period.

Operating income in Latin American operations during the first quarter, which is a vacation period, amounted to SEK -121 m. (-122). The positive effect of higher volume in Brazil was offset by decreased margins, due to the more than 10 percent depreciation of the Brazilian currency and lower volume in Argentina.

Earnings of **European customer finance operations** rose to SEK 70 m. (38), mainly due to portfolio growth and to some extent the customer finance operations included in the Beers acquisition.

Operating income in **passenger car operations**³ fell to SEK 9 m. (56), essentially due to lower sales volume.

- ² European operations are the portion of Scania's operations that, in principle, supply all markets except Latin American ones with the company's products, services and financing.
- ³ Passenger car operations include half the importer operations of the Svenska Volkswagen Group in Sweden; the wholly owned portion of the Swedish car dealership network for Svenska Volkswagen products, Din Bil; and a car dealership network in Finland and Switzerland.

Net financial items totalled SEK -133 m. (-150). They improved in Latin American operations due to favourable currency rate effects on local borrowing, while they deteriorated somewhat in European operations, mainly due to the acquisition of Beers.

The Scania Group's **tax expenses** were equivalent to 30.0 (30.7) percent of income after financial items.

CASH FLOWS

Scania's **cash flows**, excluding customer finance operations and acquisitions, rose during the first quarter to SEK 571 m. (481).

Cash from operating activities amounted to SEK 1,229 m.

Tied-up working capital rose by SEK 239 m. The increase was attributable in its entirety to European operations.

Net investments totalled SEK 419 m. (382). Including acquisitions, investments amounted to SEK 1,278 m. (395).

EMPLOYEES

The number of employees, including contract employees, totalled 28,540 (25,906) at the end of the first quarter. This represented an increase of 1,479 persons since the beginning of the year, which was attributable to acquisitions.

MISCELLANEOUS

Changes in accounting principles

Beginning with the first quarter of 2001, Scania is applying the new recommendation RR 11 of the Swedish Financial Accounting Standards Council concerning revenue recognition. This means that revenues on "operating leases" as well as on other sales with repurchase obligations are reported successively over the life of the lease instead of being reported at the time of delivery, as previously. As a consequence of this, the equivalent assets remain in Scania's balance sheet exclusive of customer financing. Payments received are reported there as prepaid income.

In the income statement, beginning with the first quarter of 2001, Scania is reporting indirect expenses related to service workshops and parts management as well as warranty expenses in marketing companies under "Cost of goods sold" instead of under "Selling expenses" as previously.

The comparative periods have been adjusted to reflect the above-mentioned changes.

The Scania Group is applying the same accounting principles as last year, except for the above mentioned changes. This report follows recommendation RR 20 of the Swedish Financial Accounting Standards Council concerning interim reporting.

Annual General Meeting

The Annual General Meeting of Shareholders is being held at 6 p.m. on Thursday, 26 April 2001 at Scaniarinken, Södertälje, Sweden. The proposed dividend is SEK 7.00 (SEK 7.00) per share, with 2 May 2001 as the record date.

Södertälje, 26 April 2001

LEIF ÖSTLING President and CEO

This Interim Report has not been subjected to special review by the company's auditors.

The next Interim Report, for January–June, will be published on 20 July 2001.

This report contains forward-looking statements that reflect management's current views with respect to certain future events and potential financial performance. Such forward-looking statements involve risks and uncertainties that could significantly alter potential results. These statements are based on certain assumptions, including assumptions related to general economic and financial conditions in the company's markets and the level of demand for the company's products.

This report does not imply that the company has undertaken to revise these forward-looking statements, beyond what is required under the company's registration contract with Stockholmsbörsen (formely the OM Stockholm Stock Exchange) if and when circumstances arise that will lead to changes compared to the date when these statements were provided.
