ÅF chosen as Preferred Supplier to Ericsson

ÅF has gained new confidence with Ericsson as its Preferred Supplier in the R&D Consultants Service area.

Moreover, for the eleventh year in succession ÅF has signed a framework agreement with Ericsson for the supply of consultancy services in technical systems development, electronic design and IS/IT.

- “Ericsson is one of the our most important customers and ÅF is now conducting several development and management projects for the company at ÅF’s development centres, including the centre in Kista. We are very pleased to have been shown this continued confidence and hope to be able to further develop our relations and be an effective partner to Ericsson”, says Magnus Ankarstrand, subsidiary company director at ÅF.

The mobile/telecommunications market is one of ÅF’s most important markets. Expansion and profits in recent years have to a considerable extent come from consultancy services in this market. This development is expected to continue. In total ÅF has 800 consultants in the IT area.
