TeliaSonera launches 3G in Kazakhstan

TeliaSonera subsidiary Kcell launches 3G in Kazakhstan. Kcell will start operating 3G in the cities of Astana and Almaty from December 1, 2010.

"The launch of 3G services in Kazakhstan opens up completely new opportunities and represents a major step for the telecom development in the country," says Tero Kivisaari, President of Business Area Eurasia. "It will significantly improve the quality and speed of data transfer services. Customers will now have access to high-speed mobile broadband and will be able to send email, play online games and transfer files. In addition, customers also will be offered a new service - video call," continues Tero Kivisaari.

The demand for increased capacity and bandwidth is something that is growing throughout the world. The launch of 3G means that countries in a development phase now get the same communication capabilities as other countries.

Kcell also obtained the official status of the mobile operator of the two biggest forthcoming events of the political and international importance to be held in Kazakhstan – OSCE Summit and 7th Asian Winter Games. Being the official partner the company will provide foreign guests and local participants and visitors of these large-scale events with high quality third generation communication services.

Forward-Looking Statements

Statements made in the press release relating to future status or circumstances, including future performance and other trend projections are forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There can be no assurance that actual results will not differ materially from those expressed or implied by these forward-looking statements due to many factors, many of which are outside the control of TeliaSonera.

TeliaSonera provides network access and telecommunication services in the Nordic and Baltic countries, the emerging markets of Eurasia, including Russia and Turkey, and in Spain. TeliaSonera is also the leading European wholesale provider of quality cross-border voice, IP and capacity services, with a wholly-owned international carrier network. TeliaSonera's services help people and companies communicate in an easy, efficient and environmentally friendly way. TeliaSonera creates value by focusing on providing world-class customer experience, securing quality in networks and achieving a best-in-class cost structure. In 2009, TeliaSonera's net sales amounted to SEK 109 billion, and at the end of December 2009 the total number of subscriptions was 148 million in 20 countries. The TeliaSonera share is listed on NASDAQ OMX Stockholm and NASDAQ OMX Helsinki. Read more at www.teliasonera.com
