Trio signs agreement with Telia Mobile for mobile office solution

Trio has signed two agreements with Telia Mobile AB in Sweden covering Trio's most advanced mobile office solution. The total value of the order is SEK 41.7 million excluding training and service.

Trio's mobile office solution is to be installed in Telia Mobile's mobile network in the autumn. The target group for the mobile office is Telia Mobile's corporate clients. No installations are required at the client company other than an attendant workstation. Customers can choose to use only mobile telephones and still have full access to switch functionality as well as an attendant workstation, call and message handling and a dynamic company directory.

"This solution will enable us to offer Swedish companies a tool that increases reachability of employees regardless of where they are, leading to higher efficiency and enhanced business relations for our customers," says Anders Bruse, President of Telia Mobile Sweden.

Trio's most advanced solution for mobile offices contains systems from two of the company's business areas, Trio PresentOffice and Trio Mobicentrex. Sonera and Telenor Mobile already offer their customers in Finland and Norway respectively mobile office solutions based on Trio's systems.

"The order is evidence that Trio can offer world leading solutions for mobile call and message handling. Additionally Trio can deliver solutions where mobile telephony integrates well with traditional fixed and IP telephony," says Sverker Hannervall, President of Trio.
