Twobyfour Software and BMC Software sign a worldwide Application Management agreement

Twobyfour Software and BMC Software, Inc. [NYSE: BMC], a leading provider of enterprise management, announce today that a worldwide agreement regarding Application Management has been signed. The agreement states that Twobyfour, with its Application Management software, will become a certified partner in MarketZone, BMC Software's global partner program.

BMC Software's MarketZone consists of strategically selected third party products that add value to BMC Software.

> "The agreement has a strategic value for Twobyfour Software as it puts a quality stamp on our products", said Ulf Zetterberg CEO of Twobyfour Software and continues, "We have been focused on Application Management since 1997 which have put our products in a market leading position."

PATROL® by BMC Software is a worldwide market leading software solution for System Management. By integrating the application management products from Twobyfour Software with PATROL®, the user obtains extended application supervision functionality directly to the normal PATROL® Console.

In business critical systems today, the applications are the area with the most failures. Therefore, it is of utmost importance to monitor and control the application and to be able to act proactively before it fails. All downtime that can be avoided reduces the user's irritation and saves large sums of money.

> "With the products from Twobyfour Software included in MarketZone our offer within Application Management will be stronger," said Per Ottosson, Country Manager BMC Software Sweden. "This worldwide agreement is a natural next step in our relationship with Twobyfour Software as we had a close relationship in customer cases before."
