Enea OSE Systems Chosen for Ericsson's 3G Development

Ericsson Mobile Technology Platform within Division Consumer Products today announced a multiyear agreement with Enea OSE Systems where Enea OSE Systems will deliver the operating system OSE for Ericsson's future Mobile Phones Platform. The order value has not been disclosed by the parties but is considered as substantial.

The agreement gives Ericsson access to strategic important system components for their coming Mobile Platform.

The agreement is an important step in Enea OSE Systems Wireless Platform strategy.

"We've been working intensively to create a wireless platform strategy that will deliver not only the power needed by what we see as the future 3G market, but also the flexibility to stay competitive through unforeseeable changes," said Mike Dager, CEO, Enea OSE Systems. "Ericsson will be a strong player on the 3G stage; the choice of our operating system validates our years of experience and R & D."
