

Enea in Closer Cooperation with Ericsson

Enea firms up the cooperation with Ericsson as a strategic supplier of products and consultant services within the area of real time operating systems to Ericsson's mobile systems.

With a multi year track record Enea has been positioned as a strategic supplier of products and consultant services within real-time technology at Ericsson. Enea's position has now been further amplified. A new agreement was recently signed by Enea Realtime and Ericsson where Enea will take a more prominent role in the development of one of the 3G product platforms within mobile systems. By the new agreement Enea has been awarded a long-term responsibility in further development and extended support. Enea's real-time operating system OSE and system integration services deliver a strong portfolio. For Enea the new contract shows a continuously strong commitment from Ericsson and re-emphasizes Enea's position as a strategic supplier to Ericsson.
