

## PA Resources' subsidiary achieves ISO 14001 certification

**The oil and gas group PA Resources announces that its wholly-owned UK subsidiary, PA Resources UK Limited, has achieved certification to the international standard for environmental management, ISO 14001:2004 (E).**

The certification is a demonstration that PA Resources UK Limited has an environmental management system that meets the requirements of the ISO 14001:2004 (E) standard. The independent accreditation bureau URS Ltd. has during the certification process undertaken a thorough audit of the company's environmental management system as applied to both office-based activities and exploration and appraisal operations on its oil and gas licences. PA Resources is actively planning seismic acquisition and drilling projects offshore the United Kingdom as well as in the Netherlands, Denmark and Greenland over the next several years.

PA Resources regards the ISO 14001 certification as an important step in developing its capability with respect to health, safety and environment (HSE) management, to achieve continual improvements and to protect the environment, its assets, employees, subcontractors and the communities around its operations.

Ulrik Jansson, President and CEO at PA Resources AB commented "This is an important step in the development of our UK subsidiary which manages PA Resources' activities in the UK, Netherlands, Denmark and Greenland. This is a way of progressively building our capability and systems in the area of health, safety and environment. The certification also reinforces our 'licence to operate' oil and gas licences in these countries".
