## **City of Stockholm signs general agreement with Cell Network**

**Cell Network Sweden has signed a two-year general agreement with the City of Stockholm. The assignment includes IT consultancy services for system development, operational development and the web.**

The general agreement covers the two years from 1 June this year, with the possibility of extension for up to two years. The City of Stockholm will purchase consultancy services worth a total of approx. SEK 90m from 63 selected general agreement suppliers over the duration of the agreement. The agreement gives Cell Network the opportunity to supply services and solutions to more than 50 of the City of Stockholm's public services and municipal companies.

"We based our choice on suppliers' financial status, quality, competence, customer references and consultancy fees," says Sinikka Suutari-Carlback, business development manager and buyer at MFO, the City of Stockholm's Equipment and Supplies Service Organisation.

"The general agreement with Cell Network gives the City of Stockholm access to leading expertise in areas such as management, advanced IT/Internet consultancy services, mobile solutions and information and IT security, along with geographical information systems (GIS) and positioning," says Magnus Söderström, Account Manager of Cell Network Sweden, Public Service Division.

The general agreement applies to Cell Network Sweden, but it is very likely that competence from other parts of the group will be required.
