APPOINTMENT IN ENSTO

Jarmo Virtanen has been appointed managing director of Ensto Busch-Jaeger Oy as of 25 June 2001. He comes to the new task from Ensto Electric Oy, where he has been responsible for the Building management systems unit.

The Ensto Building Technology business unit's core expertise serves new building technologies which optimise the functionality of a building during its entire life span. Ensto Busch-Jaeger Oy is one of the companies within this business unit and it develops, manufactures and markets electrical installation accessories and materials as well as control and bus technology systems. The company's turnover in the year 2000 was 22.6 million euros and the number of the employees 115.

Ensto is an industrial group specialised in the development, manufacturing and marketing of electrical accessories. Its business operations are grouped into four business units: Building Technology, Utility Networks, Enclosures and Components, and Industry.
