Press Release

New Hotellinx masters all kinds of reservations in one program

Hotellinx Systems Ltd, the Finnish based hotel software company, announces that the beta version of its new Hotellinx Suite PMS software package is now ready.

The current Hotellinx has been installed in hundreds of hotels in over twenty countries during the last four years. Hotellinx Systems Ltd says that Hotellinx Suite will be a very attractively priced solution for middle-size hotels. The hotels can buy the whole range of Hotellinx Suite software pieces at one workstation-based price.

In Hotellinx Suite rooms, meeting rooms and other facilities can be handled within the same reservation.

The Hotellinx Suite product line includes reservations, front office, point of sales, sales ledger and marketing. Hotellinx Suite runs in all the latest Microsoft Windows environments.

Hotellinx Systems Ltd emphasizes that the software is very easy to install, learn and maintain. Especially the training material is superior to what other systems offer.

The software package can be expanded with Internet reservations and integration to other systems like email, telephone exchange, point of sales, payTv and electronic locking systems.

The Hotellinx products are sold and supported through a distributors network, which consists of 15 companies covering over 30 countries. The final release of the new Hotellinx Suite is estimated to be available during the fourth quarter of 2001.
