Scandiaconsult - service provider for the 3G rollout

Scandiaconsult has signed a frame agreement with Ericsson, giving the company the status of 'Global Approved Resource Provider'. The frame agreement involves the appointment of Scandiaconsult as an approved supplier of services and expertise relating to the rollout of mobile networks.

"Scandiaconsult's strength is its size and ability to manage assignments globally," says President and CEO of Scandiaconsult, Torbjörn Torell. "We have acquired in-depth experience within design, planning, construction management, construction administration and project management. We are delighted to have the chance of being able to offer our staff this possibility of working on assignments within our core areas in close collaboration with a multinational company like Ericsson."

Scandiaconsult has been given comprehensive assignments in projects relating to mobile networks in over 25 countries. In the autumn of 2000, SCC Network Service was formed in order to gather and clarify the company's expertise within the area. Scandiaconsult now offers turnkey construction related services within the rollout of mobile networks. The services cover everything from Site Acquisition, through design to project and construction management.
