

Press release 13 July 2001

KMT has received another order from Volkswagen

Lidköping Machine Tools AB (LMT), a company within the KMT Group, continues to strengthen its strong position within the Volkswagen Group. The new order is for centerless grinding machines to the value of about SEK 20M.

Furthermore important orders have been signed lately with other players in the European car industry. All in all this means a considerable increased order intake from this category of customers as well as an increased market share for LMT concerning deliveries of special grinding equipment to the car industry.
