# **ProAct strengthens presence on the west coast of Sweden**

## **ProAct NetWorking AB opens an office in Gothenburg**

After two and a half successful years in Stockholm, the time has come for ProAct NetWorking to establish itself in Gothenburg. ProAct is a part of ProAct IT Group, the Nordic Region's leading specialist and integrator in the field of infrastructure for securing mission-critical information. The establishment of ProAct NetWorking will result in a greater focus on the business areas security, networks and management.

"As a systems integrator, it is extremely important to be close to your customers. We have long been engaged in a large number of projects in the Gothenburg region. Having an office in the city will help us to increase the accessibility – and thus the quality – of our services," says Leif Gyllenberg, deputy CEO of ProAct NetWorking AB.

The setting up of ProAct Networking means that ProAct can now offer specialist competence in all of ProAct's areas of expertise at the local level, making the company a complete systems integrator in the field of infrastructure.

"ProAct is to become the preferred partner for security and networking services in western and southern Sweden. Our flexible organisation, technical know-how and wide range of working partners and suppliers will make us the obvious choice for customers in the region," says Niklas Dahl, who will start as regional manager for ProAct NetWorking on 6 August.
