

## **ECCO2 Chairman Talks to Press About President Obama's Comments About US Government Shutdown Rumors**

AUSTIN, Texas, April 7, 2011 – Cary Lee Peterson, president and chairman of [DBS Distributors, Inc.](http://www.ecco2.us), ([www.ecco2.us](http://www.ecco2.us)) and non-profit, sister company to [ECCO2 Corp](#) (together known as DBS-ECCO2) talks to press regarding President Barack Obama's comments to press Tuesday, April 5, 2011, stating the “last thing” the US needs is a shutdown following recovering from a economic recession.

Cary Lee Peterson, DBS-ECCO2's chairman-president comments, “President Obama is cleaning up a mess that is more than a decade old. Let's give him some grace and empathy. Rome was not built overnight. New York City was not cleaned up in a week. Ask former mayor, [Rudy Giuliani](#). Lets accept the negative aspects of our economy and pursue to mitigate these matters in a positive status without the religious or political derelictions that have nothing to do with survival within our society or human race. What type of example does the US set for the world arguing amongst one another about intangible opinions and concepts that do not enable macro- and micro-economic issues that have been the primary root of political and social quarrels that corner municipal, state, federal, and foreign governments into a ‘Tower of Babel’ theory? In our delegations and elections are we doing what we do for personal beliefs that are biased or do we act upon motives of principle? If we are not acting upon principles of our nation we need to correct these mistakes immediately and get back on the fairway.”

DBS-ECCO2 has been active in media and politics over the past year in efforts to enable economic development, awareness on global warming, and establishment of a mutual agreement with the United Nations ([UNFCCC](#)) diplomats and observer organizations that

have held meetings in Mexico City, Mexico and Bangkok, Thailand in the last month to discuss implementation for the Cancun Agreement and the [Kyoto Protocol](#) in strong efforts to reduce carbon emissions and provoke energy efficient solutions worldwide.

Peterson says, “Most of us are aware of the global political issues we face today. Let us set our differences aside for a day. Talk civilized; no opinions, insults, or pride. Democrat, Republican, Christian, or Islam. Lets talk people and survival. Energy, fuel, and sustainability management and organization is pertinent today. The ‘energy’, ‘environment’ and ‘economy’ topics affect too many aspects of world society besides gas in our cars or energy in our homes. Who said a day of world piece was impossible? We can respect one another’s opinions as long as they do not violate comfort levels, are mature, and intelligent enough as human beings to do this aren’t we? I believe so and have dedicated every bit of my time to be a part of the solution and not the problem. I am one man and human, created from heavens and earth; from a society that is selfish, evil, and abusive. You can help the world you live and breathe in and there’s no excuse.”

Popular Haiti presidential-candidate, [Michel Martelly](#) and [Prime Minister Jean-Max Bellerive](#) were supporters of ECCO2 in Haiti inclusive to other world leaders. DBS-ECCO2 manufactures and distributes energy efficient products that are cost effective and economically viable, unlike other ‘green’ products on the market today. ECCO2 has been featured and promoted in [Forbes Magazine](#), Wall Street Journal, and various other media outlets throughout the world. ECCO2 is currently involved in a merger-acquisition that will complete within the upcoming weeks with a public shell company registered with the Securities Exchange Commission ([www.sec.gov](http://www.sec.gov)). The company currently holds partnerships with commercial and government agencies with plans to create tens and thousands of job opportunities in addition to enabling upgrades for energy efficient cars, homes, and businesses with ECCO2’s micro-turbine system that will be nearly free of charge to end users (after tax credit or rebate) upon clearance with [Energy Star](#), an international standard for energy efficient consumer products originated in the United States of America, recently adopted by Australia, Canada, Japan, New Zealand, Taiwan and the European Union.
