

Enics Plans to Strengthen the Cooperation Between Sites in Elva, Västerås and Finland

Press Release - Zurich, Switzerland, 13 April 2011 – Enics announced today that it is exploring possibilities to further enhance its customer focus and service capabilities by strengthening the cooperation between Elva, Finland and Västerås plants.

According to the initial plans, Enics Lohja and Västerås sites would have the role of customer competence centers. These plants would additionally concentrate on enhanced engineering services, world-class manufacturing services for low volume and high mix production as well as value-add after sales services. Utilizing the experience in high volume production Elva plant would have its main focus on world-class manufacturing.

"Finding innovative ways of collaboration between these sites and offering a complete set of services would provide great benefits to our customers and clearly enhances our competitive offering. Seamless communication and streamlined customer interfaces improve our customer service and satisfaction and therefore also create new business possibilities for customers and us. We can become more flexible and sharing of best practices will become even easier", says Mr. Ari Räisänen, Senior Vice President, Supply Chain and Operations, Enics Group.
