**PNY launches its XLR8 OC overclocked range with two GeForce graphics cards: the GTX 560 Ti OC and the GTX 560 Ti OC<sup>2</sup>**

*PNY offers amazing performance at a great price to overclocking enthusiasts.*

**Mérignac, France – 04 May, 2011** -- PNY Technologies is pleased to announce the launch of two new overclocked graphics cards: the GeForce® GTX 560 Ti OC and the GeForce GTX 560 Ti OC<sup>2</sup>, which currently offer the best price / quality ratio.

Both of these PNY newcomers enable users, hardcore gamers or those simply looking to obtain the best from their machines or to upgrade and increase performance in order to run the latest games with highly detailed graphics, which demand a high level of power.

With the OC version clocked at 850 MHz and the OC<sup>2</sup> version (limited edition) clocked at 900 MHz, these cards have 1 GB of GDDR5 on the 256bit bus and three outputs each (2 DVI-I and 1 Mini-HDMI).

Users can enjoy the following features:

- **Designed for DirectX 11:** the GTX 560 Ti's overclocked GeForce GPU guarantees unparalleled performance compatible with DirectX and optimises any game's reality thanks to its capacity to view characters and landscapes in outstandingly sharp detail.
- The **NVIDIA® CUDA** technology brings with it the power of GPU processing cores to speed up even the most demanding of system tasks.
- The **NVIDIA PhysX** technology enables new physical interactions, making for a

more dynamic and realistic gaming experience.

- Play in 3D – thanks to **NVIDIA® 3D Vision** technology, the user will be able to enter a new virtual universe, whether viewing games, videos or photos.

The PNY GeForce® GTX 560 Ti OC and GeForce GTX 560 Ti OC<sup>2</sup> have just joined PNY's new XLR8 OC range of extremely powerful graphics and memory cards. For a complete offer with limited additional costs, users wishing to obtain optimum performance for their machine can also add overclocked memory modules such as the [Dimm DDR3 1600MHz \(PC3-12800\) 2GB XLR8 OC](#).

Like all PNY cards, the PNY GeForce® GTX 560 Ti OC and GeForce GTX 560 Ti OC<sup>2</sup> come with a **3-year guarantee** and PNY's technical support is managed entirely in Europe.

**Technical Specifications:**

<b>GeForce GTX 560 Ti OC</b>	
Bus connector	PCI Express®
Outputs	DVI-I, DVI-I, Mini-HDMI
Memory capacity	1 GB GDDR5
Memory interface	256-bits
Core clock	850 MHz
Shader clock	1700 MHz
Memory clock	4104 MHz
<b>GeForce GTX 560 Ti OC<sup>2</sup></b>	
Bus connector	PCI Express®
Outputs	DVI-I, DVI-I, Mini-HDMI
Memory capacity	1 GB GDDR5
Memory interface	256-bits
Core clock	900 MHz

Shader clock	1800 MHz
Memory clock	4212 MHz

#### **Pricing & availability:**

PNY GeForce GTX 560 Ti OC : 1 949 DKK

PNY GeForce GTX 560 Ti OC<sup>2</sup> : 1 999 DKK

#### **About PNY Technologies:**

Established in 1985 in New Jersey (USA) and 1994 in Europe, PNY Technologies delivers a full range of high quality products for everything in and around the computer. The company is a worldwide market leader for flash memory, USB Flash drives and high-end memory upgrade modules. PNY also offers a full line of consumer graphics as Authorized NVIDIA Board Partner and a full exclusive NVIDIA Quadro® by PNY professional graphics. In tailoring its product lines, the company has built substantial brand awareness and established strong relations with retail and distribution channels. Its product lines account for a majority share of retail sales in U.S and Europe. Thanks to its partnerships with major OEMs, PNY Technologies bring constant improvements in all the latest technologies, guaranteeing quality and service.

Headquartered in Parsippany, N.J for the USA and in France for Europe, PNY maintains manufacturing facilities and/or sales offices in North America (Santa Clara, Calif. and Parsippany, N.J) ; Europe (France, Great Britain, Germany, Italy, Nordic, Spain, Benelux), Middle-East and Asia/Pacific.

The Company has enjoyed continued growth and success since its inception, expanding its product and service offerings into new channels, and has distinguished itself through a unique ability to deliver superior products and added value services to all of its customers.
