

Sigma to provide security copy back-up service to Elanders

Sigma has signed an agreement with Elanders Infologistics for the provision of back-up service for security data copying. The agreement covers Elanders Anymedia, Elanders KåPe and Elanders Solutions, and corresponds to an order value of SEK 1.5 M.

“We back-up all business-critical data via Sigma. Instead of spending valuable time on an in-house back-up solution, we are now able to focus on our operation. This strengthens our offering to our customers because it provides us with a sales argument for the database-dependent services we offer our customers,” says Johan Thege, Technical Manager at Elanders KåPe.

The service involves security copying being centralized and controlled from Sigma’s operations center in Stockholm. The fact that data is stored separate from Elanders’ own servers means that it is secure in the event of fire, theft, computer malfunction or operational error. Elanders are also able to recreate data either via a web interface or by contacting Sigma’s First Line Support, which takes responsibility for ensuring that the assignment is carried out.

“It is growing increasingly important for today’s businesses to be able to recreate lost information. Efficient back-up management is therefore essential in the security of business operations. We are witnessing increased demand in this field, and this is entirely in line with our focus on storage solutions,” says Nils Boghammar, President of Sigma Måldata Network Solutions.

Elanders AB is the leading infomedia Group in the Nordic region. The Group has approximately 2,000 employees in Sweden and abroad. Its business concept is the development and distribution of information regardless of media. Its operations are divided into two business areas, Infologistics and Infoprint.

Sigma Måldata Network Solutions functions as a systems integrator and offers services, products and solutions within IT infrastructure.

Sigma supplies solutions that safeguard the customers’ competitiveness. Operations are based on entrepreneurial, niche subsidiaries that develop services and products in close cooperation with customers. Services are offered within three business areas: Business Solutions, IT Solutions, and Network & Wireless Solutions. The Group has approximately 1,300 employees within 33 subsidiaries in Sweden and six other countries. Sigma is listed on the O-List of the Stockholm Exchange. www.sigma.se
