

#### **POSSIO BREAKTHROUGH IN CHINA**

**Possio signed a sales and distribution contract with Oriental, a company in China. Oriental is an exclusive distributor for OKI, and the company now expands its portfolio by taking on Possio's products.**

Through the Oriental contract, Possio gets a strong partner in China – a partner with a developed distribution and sales chain. Oriental has offices in Beijing and retailers in 30 large cities throughout China.

Oriental will distribute and sell Possio's products to companies and consumers via its entire sales network. Possio believes that Oriental has the competence that's required for selling telecom and network systems on the complex Chinese market.

With current and future deliveries to Oriental, China's position is confirmed as one of the company's most important markets for new and existing products. In conjunction with the contract, Possio will further strengthen its presence in Asia.
