

## Telelogic DOORS selected by major US communications company

**MALMÖ, Sweden – December 28, 2001** – Telelogic (Stockholm Exchange: TLOG), the leading global provider of solutions for advanced software and systems development, today announced that a leading US communications services company with global operations signed an agreement to purchase additional Telelogic DOORS, the leading requirements management tool. The total value of the agreement amounts to US\$450,000 for licenses, maintenance and accompanying services.

With this agreement the customer selected DOORS as their standard requirements tool for implementation in one of their US sites and is discontinuing use of other requirements tools.

“Given the current weak market conditions it is reassuring to see companies investing in future expansion of their development organizations and that Telelogic thereby is the natural choice for solutions to help cut costs and shorten time-to-market of their products,” said Anders Lidbeck, President and CEO for Telelogic.

This will allow the customer to take advantage of reuse and commonality of requirements while improving their delivery schedules and product quality. Having over one thousand potential users and hundreds of attributes to track and manage, a critical business issue was to select a solution that can scale as they continue to expand their product offering. Also, a solution that interfaces with other 3<sup>rd</sup> party tools in the organization was especially valuable. These are typical strengths of Telelogic DOORS as well as Telelogic’s tools in general.

### About Telelogic

Founded in 1983, Telelogic® ([www.telelogic.com](http://www.telelogic.com)) is the leading global provider of solutions for advanced software and systems development. The company's automated application lifecycle solution includes integrated best-in-class software and professional services for requirements management, change and configuration management, development, testing, and documentation. Telelogic enables organizations to improve quality and predictability, while reducing time-to-market and overall costs in software and systems development. Built on an open architecture that ensures interoperability with other leading third-party solutions, Telelogic's products are based on international standardized languages and notations. Telelogic participates in 3GPP, Bluetooth SIG and OMG to create future communication technologies and visual software development languages.

Headquartered in Malmö, Sweden the company has more than 1,000 employees worldwide. Customers include Airbus, Alcatel, BMW, Boeing, BT, DaimlerChrysler, Deutsche Bank, Ericsson, Lockheed Martin, Lucent Technologies, Motorola, NEC, Nokia, Philips and Siemens.
