

Nexus Develops Role-based Digital ID for the German Market in Partnership with D-Trust

Nexus have received an order from D-Trust in Berlin concerning Role-Based Digital Identities i.e. Attribute Certificates. With Role-Based Digital Identities new possibilities to protect and use information and services are achieved, based on a person's role rather than the identity. The Attribute Certificate is a complement to the personal certificate.

Areas of use are for example Health Care, Defence and the Public Sector, where a number of individuals can have the same function and thereby gain access to the same information and services.

D-Trust are Certificate provider for the German State Administration and have been a customer of Nexus for several years. D-Trust use the Nexus Certificate Management solution for their Trust Services in the German market.

Nexus is participating in other interesting solutions in Germany. One of these is Volkswagen where the Nexus Certificate Management solution is used for issuing user certificates to over 30 000 employees.

- "The German market is important for Nexus and we see great opportunities in this cooperation. D-Trust is a leading Trust Service Provider to the authorities and public sector in Germany. This partnership strengthens our position in the German market significantly", says Gustaf Malmros, Executive Vice President and Business Area Manager of Nexus.

Facts about D-Trust

D-Trust GmbH, was founded 1998 in Berlin and is a wholly-owned subsidiary of Bundesdruckerei GmbH. The D-Trust Trust Centre is operated in the protected environment of Bundesdruckerei's high-security building.

In 2001, D-TRUST GmbH announced operations as a certification authority in conformance with the Signature Act, and was accredited in March 2002 by the Regulatory Authority for Post and Telecommunications.

Following a voluntary security review by the German TÜV-IT, a leading testing and certification body in the field of information technology,, D-TRUST is now entitled to refer to itself as the leading German trust center.

In February 2003, this independent test agency granted D-TRUST GmbH the highest level of security, "Trusted Site Infrastructure – Level 3". No other German certification authority has this distinction!* (as of February 2003).
