

Pressrelease 1999-08-12

New Telecommunication contracts

PartnerTech has received two new assignments from customers within the area Telecommunication which both concern production of complete products.

From Ericsson, an assignment to produce a complete product that filter and manage the signal from the mobile terminal to the base station. Annual value is anticipated to be 30-50 MSEK.

From Kreatel, an assignment to produce a router that selects cheapest telecom operator. The order value is anticipated to be 10-15 MSEK during this fall.

PartnerTech AB (public listed) develops and manufactures electronic products under contract for leading growth companies, mainly within telecommunications, information technology and medical technology. The company is quoted on the Swedish Stock Exchange and had for the first six months 1999 net sales of almost SEK 400 million.
