PRESS RELEASE

Helsingborg 12 October 2004

ReadSoft and StreamServe partners on e-invoicing

The Swedish software suppliers ReadSoft and StreamServe announce a cooperation to offer fully electronic invoice processing. The new offering makes electronic communication between companies much easier.

At ReadSoft, efforts are intensified to offer completely electronic invoice flows between companies. With this partnership, both companies take a strategic grip on the development towards fully electronic invoice flows. Customers using ReadSoft DOCUMENTS for Invoices will be able to receive large volumes of invoices electronically. This lowers costs, simplifies handling, and rids companies of paper shuffling.

StreamServe's expertise lies in creating output data from different business systems. StreamServe's Swedish customer base will now be able to send electronic invoices to ReadSoft's customers as well.

"ReadSoft's software is the business standard when it comes to capturing information from invoices. It fits perfectly with StreamServe's new e-invoicing solution. The application is developed for various Business Systems and complies with book keeping Acts and security regulations, says Christian Hadenius, President at StreamServe Nordic.

"The demand for reliable solutions for electronic invoice flows is growing steadily and many companies demand that their suppliers are able to send their invoices electronically. This is a promising cooperation which is a compliment to our own technology (EZ-OUT) for sending invoices electronically. The partnership opens up new doors for us towards large and mid-sized companies using StreamServe's output system. These companies will be able to send electronic invoices to far more companies than before," says Jan Andersson, President at ReadSoft.

"StreamServe makes it possible to increase the number of electronic invoices sent to ReadSoft's systems and thereby decrease paper handling. ReadSoft gives StreamServe an advantage through their ability to capture incoming invoices automatically," finishes Christian Hadenius, President at StreamServe Nordic.
