## **Boss Media signs contract with new IVT-customer**

Boss Media AB has signed a pilot agreement with the Czech gaming operator SYNOT LOTTO a.s for a limited number of gaming machines positioned in various locations in the Czech Republic. The machines are connected to a central system via a client/server solution. The system will offer players a wide range of games, including roulette, video poker and slot machine games.

The Czech government recently issued three VLT licenses (Video Lottery Terminal), one of which was awarded to SYNOT LOTTO. The Ministry of Finance and local authorities have been given an opportunity to seek information on real-time gaming, and supervision can take place on various levels, from a national or regional level down to the individual gaming machine.

The pilot agreement is for a period of six months. During this time, technical and financial requirements will be established for developing the installation into a financially viable operation for all parties. The first machines will be installed during the autumn.

“We offer a highly flexible system that we can customize and configure for different markets, with new languages, gaming machines, communication solutions, games and so on. The deal with SYNOT LOTTO is a good example of how we can adapt our systems to the customer’s unique requirements,” says Krister Bergström, Vice President of Boss Media.
