No 57/04

NCC to build CHP plant in Sundsvall for SEK 180 million

NCC has been commissioned by Sundsvall Energi AB to build a CHP (combined heating power) plant for waste fuel at the Korstaverket plant in Sundsvall. The order is worth about SEK 180 million.

The project comprises foundation engineering and the construction of the building for the CHP (combined heating power) plant. Construction work will commence on November 8 and is scheduled for completion on August 15, 2006.

The construction work will generate many job opportunities during the two-year construction period and NCC estimates that approximately 50 employees and about another 50 subcontractors will be employed on the project.

The project will be included in orders received during the fourth quarter of 2004.
