

Sigma concentrates its system integration resources; three subsidiaries merged into one

Three Sigma subsidiaries, Måldata AB, Måldata PC Integration AB and Måldata Teknik AB are currently being merged to form a single unit, Sigma Måldata Network Solutions AB.

"Through this new company, we can provide our customers with greater opportunities to develop and improve their IT environments," says Håkan Karlsson, President of Sigma Måldata Network Solutions AB.

The new company is part of Sigma's e-solutions business area and will generate clearly positive synergistic effects, according to Håkan Karlsson. "Customer companies and organizations will have the chance to cooperate with a single supplier when purchasing computer and telecommunications solutions, server and workplace solutions, infrastructure solutions or strategic analyses."

Sigma Måldata Network Solutions has approximately 150 employees and is a complete supplier of IT infrastructure solutions, with operations in the following ten specialized areas: Strategy & Project Management, Networking, Novell Solutions, Microsoft Solutions, Voice, Infrastructure Broadband, StoreIT, Security, IT Services and Support.

"We are highly optimistic about the future, since we have the pleasure of working with development-intensive customers and market-leading suppliers and partners. Moreover, we can provide our customers with all of the expertise assembled within the Sigma Group," concludes Håkan Karlsson. Sigma Måldata Network Solutions will participate in the Networks Telecom 2000 exhibition in Stockholm.

Sigma is a leading supplier of consulting services in the areas of e-solutions, embedded solutions and engineering solutions. The Group, which has some 3,000 employees in eleven countries, focuses on solutions for interaction, innovation and integration. Sigmas guiding principle is to strengthen its customers competitiveness and brands. (www.sigma.se)
