

Sigma to deliver document management system to MODUL Service AB

Sigma has received an order from MODUL Service AB to deliver and install the *advantum®* document management system.

In addition to delivery and installation of the *advantum®* document management system, Sigma will be responsible for integration of *advantum®* with MODUL Service's business system, CAD program, intranet and office system.

"Advantages of the *advantum®* system include rapid start-up and that it is simple to use, maintain and revise. The system is easily accessible and as a standard supports integration with a number of programs and functions, such as CAD programs and applications in Microsoft Office," says Joakim Svensson, President of Sigma Info Tech. "The implementation at MODUL Service AB will also include integration with the company's intranet and its MOVEX business system."

MODUL Services develops, packages and offers fittings for the furniture industry. MODUL has its own plants, with its own organization for purchasing, production and sales, in Sweden, Slovakia and China.

Sigma supplies solutions and consultancy services within the IT field that safeguard customers' competitiveness. Operations are based on entrepreneurial, niche subsidiaries that develop services and products in close cooperation with customers. Services are offered within the Business Solutions, IT Solutions and Information Solutions business areas. The Group has about 800 employees in some 20 subsidiaries in Sweden and three other countries. Sigma is listed on the O-List of Stockholmsbörsen (Stockholm Exchange). www.sigma.se
