

Sigma expands framework agreement with Sweden Post

Sigma secures a renewal of its framework agreement with Sweden Post for IT services.

"We assigned the website top priority as many customers first come into contact with us via www.myresjohus.se or constantly search the Internet for more information. We set very high requirements in terms of technical solution, specifications and choice of supplier, and we are very pleased that we finally chose Sigma," says Michael Kullberg, Sales Manager at Myresjöhus.

"Our aim is to further expand our cooperation by offering cost-effective changes for Sweden Post," says Bert-Ola Bångman, President of Sigma ProCom and its key account manager for Sweden Post.

The agreement, which is for one year, includes services in system development, IT and system architecture, web design, project management, operations development, quality assurance and testing, and SAP services. Sigma is already deeply involved in several of Sweden Post's strategic projects, such as Posten.se.

Sigma delivers IT solutions and consulting services to development-intensive customers. Operations are based on entrepreneur-driven, niche-oriented subsidiaries, which are organized through the Business Solutions, IT Solutions and Information Solutions business areas. The Group has approximately 750 employees in Sweden, Denmark, Finland and Switzerland. Sigma is listed on the O-List of Stockholmsbörsen (Stockholm Exchange). www.sigma.se
