

## Press Release

Stockholm November ??, 1999

### **Limt receives new contracts from two Korean cable operators**

Limt, Inc., the US subsidiary of Limt AB Sweden has received their 7<sup>th</sup> and 8<sup>th</sup> order this year for its DMM digital cable ad insertion system with a total order value of approximately 1 million SEK.

The Korean operators Saeronet Cable TV Network and Cheju Cable TV Network will install a 8-channel and a 6-channel DMM systems respectively before end 1999.

The systems includes both Limt's central management and control system the remote Ad-insertion Video Server DMM.

DMM's single channel server architecture is growing in popularity as the system's overall reliability and ease of use continues to be recognised.

Limt continues to enjoy approximately 90% market share in Korea and through its partner, JW Systems, continues to provide the high level of customer support Limt requires of its distribution representatives.

#### **Limt in brief**

Limt is developing, manufacturing and marketing products and services for the TV industry, including TV-Automation and Remote ad insertion systems for distribution of spots in national or regional TV broadcasts. Limt supplies total system solutions with its own developed hard- and software. Limt is active in the market for Cable, Broadcast and Information Providers with a primary focus in USA and selected countries in Europe.
