

Oslo Børs extends agreement with OMX Technology

Oslo Børs, the Norwegian stock, bonds and derivatives exchange, has signed an agreement with OMX Technology, the trading technology and solutions provider, regarding an extension of the facility management contract for the SAXESS™ trading system until the end of 2010.

Oslo Børs became a member of the NOREX Alliance in 2000 and started trading on the SAXESS trading system in 2002. Today, SAXESS is also in use at the stock exchanges in Denmark, Estonia, Finland, Iceland, Latvia, Lithuania and Sweden.

“The SAXESS trading system has met our demands concerning functionality and stability and it gives us excellent distribution to the world’s investors. We are satisfied with the system and are pleased to continue trading on SAXESS until the end of 2010,” says Sven Arild Andersen, President and CEO of Oslo Børs.

“I’m highly pleased that Oslo Børs and OMX have extended the relationship through this new agreement,” says Magnus Böcker, CEO of OMX. “Oslo Børs is a very important partner to OMX, and we will continue to work closely together to realize the goal of creating an efficient and high quality Nordic securities market.”
