Axis introduces new wireless print server

Axis Communications introduces a new wireless print server that provides a user-friendly and cost-effective solution for sharing printers. The new AXIS OfficeBasic USB Wireless, which is primarily targeted at small businesses and home users, makes it easier to share a printer and forms a key addition to Axis' already broad market offering.

The strong trend towards wireless connectivity has generated a quickly increasing demand for wireless print solutions. It is therefore natural for Axis, the leading independent supplier of cost efficient and flexible network print solutions, to continue to extend its wireless print server offering.

The print server connects to any printer that has a USB port and enables the printer to be easily shared. Being wireless, the solution allows for a more flexible placing of printers and the possibility to print wirelessly from laptops that are temporarily connected to a home or office network.

Combining easy installation, high reliability and multilingual support, the AXIS OfficeBasic USB Wireless print server is one of the most user-friendly solutions available on the market today. Even first time users will be able to have the print server up and running in no time, with no need for assistance. Other benefits include the attractive pricing and the unit's small and appealing design.

The AXIS OfficeBasic USB Wireless print server is available through Axis' distribution channels from June 2004. For more in-depth product information and photos, please visit www.axis.com

About Axis

Axis increases the value of network solutions. The company is an innovative market leader in network video and print servers. Axis' products and solutions are focused on applications such as security, surveillance, remote monitoring and document management. The products are based on in-house developed chip technology, which is also sold to third parties.

Axis was founded in 1984 and is listed on the Stockholmsbörsen (XSSE: AXIS). Axis operates globally with offices in 14 countries and in cooperation with distributors, system integrators and OEM partners in 70 countries. Markets outside Sweden account for more than 95% of sales. Information about Axis can be found at www.axis.com.
