GROUP STRUCTURE FROM 1 APRIL 2006

From financial year 2006/2007, which commenced 1 April 2006, the Group is organised in three divisions: Electronics, Mechatronics and Communications. Comparative data for the preceding year have been adjusted to account for this change.

NET REVENUES AND RESULT

Net revenues of the Lagercrantz Group during the first six months of 2006/07 (1 April – 30 September 2006) increased by 15 percent to MSEK 887 (772). The revenue increase was mainly attributable to acquired businesses that contributed with MSEK 108. The rate of increase during the second quarter was 18 percent, when consolidated revenues increased to MSEK 456 (385), of which 67 MSEK was derived from acquired businesses.

All divisions recorded increased revenues for the first half of the year compared to the preceding year. The largest increases were seen in divisions Mechatronics and Communications.

Operating income during the first six months of the year increased by 45 percent to MSEK 42 (29), which is equivalent to an operating margin of 4.7 percent (3.8 percent). During the first quarter, a realisation gain of approximately MSEK 5 was recorded from a sale of real estate. Operating income during the second quarter amounted to MSEK 21 (14), equivalent to a margin of 4.6 percent (3.6 percent). Earnings improved during the second quarter in divisions Electronics and Mechatronics compared to the preceding year, while the result in division Communications was lower. Acquired businesses as well as existing businesses from prior periods contributed to the earnings improvement.

Income after financial items for the period April – September 2006 amounted to MSEK 39 (28), which is equivalent to a profit margin of 4.4 percent (3.6 percent). Changed foreign exchange rates affected consolidated income by approximately MSEK 0 (1) during the period.

Earnings per share increased to SEK 1.22 (0.79) during the first six months of the year.

Order bookings during the first six months increased compared to the preceding year. Order bookings during the second quarter declined slightly compared to the first quarter, primarily due to seasonal variations.

PROFITABILITY, FINANCIAL POSITION & CAPITAL EXPENDITURES

The return on capital employed for the past 12-month period was 13.1 percent, compared to 13.4 percent for the 2005/06 financial year. The corresponding data for return on equity were 12.6 and 10.2 percent, respectively.

Cash flow from current operations amounted to MSEK –47 (3). The lower cash flow is due to an increase in working capital, especially due to higher accounts receivables, as a major portion of billing took place during the latter part of the period.

Corporate acquisitions were made during the first six months of the year for approximately MSEK 133. Other expenditure for non-current assets amounted to MSEK 23, gross (9). The higher rate of capital expenditures is due primarily to a number of investments in machinery made in division Mechatronics. The proceeds of a real estate sale accounted for during the first quarter were received during the second quarter. No shares were repurchased during the first half of the year.

The Group displayed net financial liabilities at the end of the period of MSEK 243, as compared with net receivables of MSEK 9 at the beginning of the financial year. The change is explained essentially by financing raised in connection with acquisitions and the higher working capital.

Shareholders' equity per share amounted to SEK 16.60, equivalent to the level at the beginning of the financial year. During the period, SEK 1 per share was paid out as dividend. The equity ratio at the end of the period was 38 percent, compared with 52 percent at the beginning of the financial year.

Divisions

ELECTRONICS

The division is a value-creating distributor of niche components and systems in electronics. Sales are based on customer-adapted solutions where components are designed into customers' products. The division's orientation is into two product areas: Wireless industrial communication (M2M) - where the division, among other things, is a leading distributor of GSM modules in northern Europe - and Embedded systems, where the division, among other things, is one of the leading in sales of industrial and marine PCs.

Net revenues for the second quarter increased by 6 percent to MSEK 186 (176).

Operating income increased to MSEK 8 during the quarter (0), equivalent to a margin of 4.3 percent (0). The primary reason for the increase in income is a more advantageous product mix for the companies in the division. This is the result of changes being made with an increased focus on two areas: Wireless Industrial Communication and Embedded Systems, both with a higher degree of solution sales and higher margins. The transformation work in the division is progressing with a clear focus to increase earnings and profitability.

MECHATRONICS

The division is a leading manufacturer of customised cable harnesses and kindred products for customers primarily in the electric and manufacturing industries. The products are tailor-made to meet customers' stringent requirements. The division is also a leading producer of electric connection systems for the Nordic market. The division also deals in electromechanical and passive components, connectors and electrical components.

Net revenues for the second quarter increased by 62 percent to MSEK 136 (84). The largest part of the revenue increase is due to that the Elpress group was included for the entire quarter. Revenue also grew at the production units in Denmark and Finland, while revenues in Sweden were lower than last year. In terms of revenue, the division's trading operations were on a par with the preceding year.

Operating income for the quarter amounted to MSEK 10 (6), equivalent to an operating margin of 7.4 percent (7.1). The improvement in earnings is due to that the Elpress group is included.

COMMUNICATIONS

The division offers products in the areas of digital image transmission/technical security, access products and software, either as a value-creating distributor or as a supplier of complete solutions. The division is a market-leader in several areas, among them video conferencing solutions in Sweden, and CAD software in Denmark and Norway. The division commands a strong position in camera based surveillance systems and other products for technical security, and in access products for telecom and broadband networks as well as data security.

Net revenues for the second quarter increased by 7 percent to MSEK 134 (125). The increase in revenues is due to acquired businesses. Revenues in comparable units decreased because of a low level of installation activity at the beginning of the quarter.

Operating income declined during the quarter to MSEK 6 (9), equivalent to an operating margin of 4.5 percent (7.2). The lower value is due to the low level of revenues at the beginning of the quarter.

K&K Active and K&K Sales are included in the division from 1 November 2006.

Financial development in brief

ACCOUNTING POLICIES AND COMMENTS

This interim report has been compiled in accordance with IAS 34 Interim Financial Reporting, which is in accordance with the requirements posed by recommendation RR31 Consolidated

interim reporting of the Swedish Financial Accounting Standards Council. The accounting policies applied are those presented in the Annual Report for 2005/2006.

Other information

PARENT COMPANY AND OTHER CONSOLIDATION ITEMS

The Parent Company's internal revenues amounted to MSEK 11 (10) and income after net financial items was MSEK 5 (6) for the first six months of the year. This result includes exchange rate adjustments on intra-Group lending in an amount of MSEK -1 (1). Dividends from subsidiaries amounted to MSEK 12 net (9).

The Parent Company has an approved committed credit facility of MSEK 250. MSEK 96 hereof was utilised, compared to MSEK 0 at the beginning of the financial year. The Parent Company also has a long-term acquisition credit in the amount of MSEK 98, raised in conjunction with the acquisition of Elpress. There were other liquid funds of MSEK 0 compared to MSEK 5 at the beginning of the financial year.

EMPLOYEES

At the end of the period the number of employees in the Group was 728, which can be compared to 543 at the beginning of the period. The increase is explained by acquired businesses.

SHARE DISTRIBUTION AND REPURCHASES

The share capital at the end of the period amounted to MSEK 48.8. The distribution on classes of shares is as follows:

Class of share	Shares outstanding
Class A shares	1 097 342
Class B shares	23 316 890
Repurchased class B shares	-736 423
TOTAL	23 677 809

Lagercrantz holds 736,423 class B shares in treasury, equivalent to 3.0 percent of the number of shares outstanding and 2.1 percent of the votes in Lagercrantz. The average cost of the repurchased shares amounts to SEK 23.12 per share. The quotient value per share is SEK 2.00.

CORPORATE ACQUISITIONS

Acquired businesses have affected consolidated net revenues by approximately MSEK 108 and income before taxes by MSEK 5 during the first six months of the financial year. If all acquisitions had been consummated by the beginning of the financial year, the effect on consolidated net revenues and income is estimated to have been MSEK 140 and MSEK 6, respectively.

Companies K&K Active and K&K Sales in Finland were acquired after the end of the period under review. K&K Active is a value-adding distributor of systems and components in telecommunications and for access networks. The company has been active since

1994 and has for a long time displayed good earnings power and strong revenue growth. During 2005 the company had revenues of MEUR 4.3, with operating income of MEUR 1.0. The company has 11 employees. K&K Sales is active in sales of fibre-optic solutions. The company had sales of approximately MEUR 0.7 during 2005, with operating income of almost MEUR 0.2. The purchase money for the two businesses amounts to MEUR 3.35, plus compensation for the net cash position in the companies. Supplementary purchase money may be payable. The companies are part of division Communications from 1 November 2006.

INCENTIVE PROGRAMME

The incentive programme resolved by the 2006 Annual Meeting for members of senior management in the Group, covering up to 255,000 call options for repurchased class B shares, was fully subscribed. The average cost of the repurchased shares used as hedge for the programme, amounts to SEK 23.12 per share. For 2006, 27 employees of the Group will be awarded options under the program.

The average market share price during the measuring period 31 August – 13 September 2006 was SEK 28.81. The redemption price of the call options thus amounts to SEK 36.00 (which is equivalent to 125 percent of the volume-weighted average paid price for Lagercrantz Group AB's share during the measuring period 31 August – 13 September 2006, inclusive). The redemption price is rounded to the nearest tenth of one SEK in accordance with the terms of the options. The redemption period is between 20 September and 20 December 2009, inclusive.

EVENTS AFTER THE BALANCE SHEET DATE 30 SEPTEMBER 2006

No significant events beyond the above described acquisitions have occurred after the balance sheet date.

Stockholm, 7 November 2006

Lagercrantz Group in brief

LAGERCRANTZ GROUP IN BRIEF

Lagercrantz Group is a technology trading group in electronics, electrics, communication and adjacent areas. The Group operates in a decentralised mode with value-creating sales close to its customers in several expansive niches.

The business is organised in three divisions: Division Electronics is primarily involved in marketing solutions in wireless industrial communication and embedded systems. Division Mechatronics offers electric and electro-mechanical components as well as production of cable harnesses and electric connection systems. Division Communications provides solutions in digital image transmission/technical security, design software and access products. Customers are primarily manufacturing companies.

Lagercrantz is today active in eight countries in Northern Europe and in Hong Kong.

The Group had revenues of more than MSEK 1,600 in 2005/06 and has approximately 750 employees.
