LFV Group selects Cybercom

The LFV Group, Swedish Airports and Air Navigation Services, has chosen Cybercom as an IT consultancy services partner. The frame agreement takes effect immediately and extends through October 2009 with a possible two-year extension.

"We're very pleased that the LFV Group has put its trust in us," says Peter French, who is in charge of the agreement at Cybercom. "It's an important agreement for us and especially significant for our operations in Linköping and Stockholm."

"We were very particular in our selection process and Cybercom demonstrated that they met our requirements," says Gunilla Pettersson, in charge of this procurement at the LFV Group. "We intend to purchase IT consultancy services within business development and strategy, administration and management, and systems development and maintenance. Consultancy services will mainly be provided to Stockholm Arlanda, Göteborg Landvetter, and Norrköping."

Cybercom is one of three vendors with which the LFV Group has signed master agreements. The LFV Group intends to purchase consultancy services amounting to about SEK 10 million annually.

"This agreement illustrates that our expertise is in great demand in industries other than telecom," says Henrik Gavelli, Managing Director of Cybercom Nord. "Much of the LFV Group's consultancy needs are based on the same expertise and technical skills that we have successfully worked with in the telecom sector for many years. We continue to extend our customer base."

The Cybercom Group is a high-tech consulting company that offers business-critical IT solutions and guidance within telecom and selected technologies. Thanks to its extensive industry and operations experience, the company can offer technology expertise within telecom for network and terminal development. Cybercom specialises in portals and mobile solutions, e-commerce and billing, embedded systems, plus telecom management consulting and networks. Cybercom was launched in 1995; since 1999, its share has been quoted on the Nordic Exchange in Stockholm. The Group runs projects worldwide and has offices in Denmark, India, Norway, Singapore, Sweden, and the UK. Cybercom currently employs about 450 persons. Find out more at: www.cybercomgroup.com.
