Optiroc's acquisition of Stråbruken will be a matter for the district court

On Friday the Swedish competition authority decided to apply at the Stockholm district court for a prohibition concerning Optiroc's acquisition of the Stråbruken company.

- The competition authority makes another assessment concerning how products are inter-changeable on the market than we do, says Cornelis Altena, President of Optiroc Group. For that reason, we will pursue the case.

Stråbruken produces brick, premix products and other mineral-based building materials and has estimated sales of SEK 300 M in 1997.
