Mack launches new truck in construction segment

AB Volvo's subsidiary Mack Trucks, Inc is launching a new truck model in the construction segment, the TerraPro™ Cabover. Mack holds a leading position in the US as a supplier of trucks in this segment. The model is a further development of Mack's popular MR series and is adapted specially for handling concrete pumping.

TerraPro™ Cabover is being launched in conjunction with the opening of the World of Concrete trade show in Las Vegas. The new model offers customers a new driver environment designed with a focus on comfort and productivity.

The new driver environment includes an ergonomic seat, spacious driver cab, effective climate-control system, easily accessible instrument and control panel and substantial storage space. Major emphasis was placed on reducing noise levels and the vibrations that arise during work operations.

TerraPro™ Cabover is equipped with an 11-liter MP7 engine that is approved in accordance with the EPA 07 emissions standard and is available in the 325 to 405 hp classes. The 13-liter MP8 engine is an alternative, which is also approved in accordance with EPA 07, available in the 415 to 485 hp classes.
