

Enea Secures SEK 6 million Software Order from North America

Enea, a world leading provider of network software and services, has secured a software order worth SEK 6 million from a North American corporation, which is a global leader in the convergence between TV and music services via mobile broadband. The order is for middleware for developing this customer's next generation of services including TV transmissions to mobile phones, smart phones and PCs. Delivery will be in the first quarter 2007.

"Enea's new software enables customers to slash development lead-times and cut costs," commented Enea's CEO and President Johan Wall. "This order is an important validation of the technological sophistication and competitiveness of Enea's new and extended product portfolio."
