About NOTE

"Our business concept is to produce electronics from design to after-sales, close to our customers." NOTE is one of the leading electronics contract manufacturers in the Nordic region, and has a presence in Sweden, Norway, Finland, Estonia, Lithuania and Poland. In 2006, net sales were SEK 1, 742 m; the group has approximately 1,100 employees. For more information, please visit www.note.se.

NOTE's main shareholder and Chairman Sten Dybeck commented:

"The Board is very satisfied at being able to tie in an internationally experienced businessman to NOTE. Kaj Samlin has solid experience of building a production business and is very accustomed to international business development. This is closely consistent with our plans for the NOTE group. As is clear from today's Year-end Report, after a challenging year in 2005, NOTE has returned to normal profitability and growth, and as a result, we view our future business opportunities with confidence."

NOTE's departing CEO Arne Forslund commented:

"This has been a very exciting and intensive phase at NOTE, with major change in a short period. The first phase of our restructuring and focusing business has now been launched, and NOTE has become an expansive, profitable corporation. NOTE's outlook is bright. Because the Board and I have differing views of the rate of change and future focus, we've agreed to go our separate ways. This has been a stimulating phase, and I'd like to thank all NOTE employees, who have been a source of great happiness in my time at NOTE."
