Scancem at the Öresund Link Exhibition

The Öresund Link Exhibition was inaugurated on February 13. It is situated at Lernacken - the tung of land in Limhamn outside Malmö where the Öresund Link will have its abutment on the Swedish side. You reach the exhibition by driving Klagshamnsvägen in the direction of Bunkeflo and turn right on Utsiktsvägen.

Each hour during opening hours there will be a bus connection - number 81 - to the exhibition, starting from the Central Station and passing among other stops Gustaf Adolf Square.

Scancem is one of the exhibition's sponsors; several of the Group's business areas have comprehensive deliveries to the bridge and its connections both on the Swedish and Danish side.

In Scancem's stand we present Scanstad - a new part of Malmö around the limestone quarry and its surroundings. You will be able to take a virtual trip through Scanstad, which will eventually have approximately 4,500 residential units and offices, etc for some 3,500. The most spectacular feature in the future Scanstad is "The Bridge House", which will be built straight across the limestone quarry as a modern Florentine Ponte Vecchio
