Thalamus Networks signs with Sweden's largest co-operative building society

The Broadband Company Thalamus Networks AB (plc) has signed with Gothenburg co-operative building society, "Bfr Masthugget", which is Sweden's largest co-operative building society with 1,231 apartments and 18,000 square metres office premises.

The first 300 within the housing co-operative who are offered Thalamus' broadband services have used broadband connections since 1998. With the new broadband provider Thalamus, more tenants can be offered broadband. The already installed network for cable-TV is used to provide these services and Thalamus partner Göteborg Energy - one of Sweden's largest energy supplier - will connect Bfr Masthugget to their fibre network.

"When using the already installed network, you are open for future services and technical solutions, at the same time as you get fast, safe and cost-efficient broadband service," states Jan Tideliuss, the Thalamus CEO.

Through the agreement with Thalamus Networks, the tenants will eventually have access to a variety of new services such as: video-on-demand, games, education services, phone services etc.

"The Bfr Masthugget's broadband connection is one way of improving the service for our members and tenants. When we chose among the broadband suppliers, we looked for suppliers who could fill our requirements for high security and service, and Thalamus met these high standards," says Kjell Johansson, Administrative Manager at Bfr Masthugget. It was also crucial that Thalamus could provide services for office premises as well.

Facts

Thalamus Networks AB (www.thalamus.se) is an independent player in the rapidly growing field of broadband. The Company offers the market's most extensive broadband service called Thalamus®. It includes Internet access that meets the requirements of the regular surfer as well as the most advanced remote access worker. At the same time Thalamus Networks is the only company that can meet the landlords' needs for energy management, information, media and telephony. Thalamus® is delivered over optical fibre, cable-TV and Ethernet (LAN), and in a near future also over wireless solutions.

Thalamus Networks AB are currently in a strong phase of expansion, and today has offices in Ängelholm, Malmö, Halmstad, Göteborg and Stockholm. The Company has provided services to Sweden's landlords since the start in 1987.

Thalamus Networks AB's net sales are approximately SEK 40 million and the company employs 37 persons.
