

Cardo wins record order for doors in USA

Cardo's business area Door has won an order in the USA worth SEK 58 million for hangar doors for the US Air Force and Air National Guard. This is the biggest door order so far for Cardo Door.

The building contractor Bucon Construction in collaboration with Butler Buildings has chosen Cardo Door's Megadoor doors for a project involving airplane hangars for the US Air Force and Air National Guard.

The doors will be manufactured at Cardo Door's American subsidiary Megadoor Inc., which has previously supplied a large number of doors to the US Department of Defense, including the Air National Guard.

Megadoor doors are designed for demanding industrial environments and very large door openings, such as in airplane hangars; and they can be made in virtually any size. Megadoor is a Swedish product that has been developed by Cardo Door's company Megadoor AB in Skellefteå, Sweden.

Cardo Door is a business area in the Cardo group and one of the world's largest manufacturers of industrial doors and Europe's leading supplier of dock loading equipment. Cardo Door is also the market leader in the service of these products and one of Europe's largest manufacturers of residential garage doors. Door's turnover amounts to approximately SEK 5 billion.

Malmö, Sweden, November 26 2001

Cardo AB (publ)
