eWork signs frame agreement for the Nordic countries with one of the world's leading telecom suppliers

eWork, the leading consultant broker in the Nordic countries, has signed a frame agreement with one of the world's leading telecom suppliers. The agreement is of two year's duration and includes all the four Nordic countries. eWork will provide its new client with IT-consultants.

— It's hard to say in advance which effect on our sales a new general agreement will have. The outcome is determined by the degree the client will use the possibilities to buy consultant services at the terms of the general agreement. But according to our experience this is one of our bigger general agreements, says Claes Ruthberg, CEO of eWork.

eWork has general agreements with large companies as Nordea, Scania, TeliaSonera, OMX, FMV (Swedish Defence Materiel Administration), Statskontoret (Swedish Agency for Public Management), Alecta, Scania, IBM, Ericsson, SEB and Swedbank.

— It is very encouraging that such a large company as our new client will use a consultant broker to meet their demand of IT-consultants in a very effective way, comments Claes Ruthberg..
