Thalamus Networks appoints Frank Kommunikation as PR- and communications consultant

The broadband company Thalamus Networks has appointed Frank Kommunikation in Gothenburg as their new PR- and communications consultant.

- We are very pleased over the assignment, says Henrik Tengby, project manager from Frank. Thalamus is an exciting actor on the broadband scene with a long and documented history.

- Today's broadband debate is marked by misunderstandings, confusion of ideas and insecurity concerning capacity and speed among other things, says Tengby. Considering this, Thalamus is one of the more serious actors, which is something Frank will focus upon.

- When we talk to net and property owners, we notice that there is a need for guidance in the broadband discussions, says Thomas Rebermark, Marketing Manager of Thalamus. Our experience in the field will help us make a difference in the debate, and we will make our opinions known with more emphasis. Frank is an important partner in this work.

Thalamus Networks AB (www.thalamus.se) is the only operator which can offer a complete portfolio of services for intelligent living. Apart from traditional Internet accesses, Thalamus also satisfies property owners' need of energy management, information, media and telephony. Thalamus® is provided over optical fibre, cable-TV and Ethernet (LAN).

Thalamus Networks is listed on the OM Stockholm Stock Exchange's O-list. The Company built Sweden's first commercial high speed property net, combined with control and communications services for landlords. Today, one of Thalamus' commissions is for Gothenburg City's energy company. In Gothenburg, Thalamus is currently connecting 16 000 single houses and Sweden's largest cooperative building society in one of the country's largest broadband commitments.

The Company is expanding rapidly and has offices in Ängelholm, Malmö, Halmstad, Gothenburg and Stockholm. The Company's net sales are approximately 40 MSEK a year and it employs 40 persons.
