INTOI sells Nocom Drift to QD System AB

Nocom Drift AB became part of the INTOI Group through the acquisition of Bizit AB in 1999. Nocom Drift AB provides high quality operating solutions in an environment that meets the most stringent security standards. Its range of services includes server operation, maintenance and monitoring of IT systems. Compared to much larger competitors, Nocom Drift has fared well thanks to its in-depth expertise in advanced operating applications. The company has a state-of-the-art hosting facility and a strong base of customers, like the County of Stockholm, that place rigorous security requirements. Nocom Drift has annual revenue of around SEK 12 million.

The sale will provide the Group with cash proceeds but is not expected to generate any capital gain. The transaction is expected to be completed on 1 October 2008 and will be reported in the fourth quarter of 2008.

“As owner, QD System AB will be able to put together a powerful offering with its successful sales organisation and supplementary services and expertise. This will provide major opportunities for Nocom Drift AB and security for its customers and employees,” says Stefan Skarin, CEO of INTOI.

“Nocom Drift AB’s extensive resources will be necessary for us to expand our IT operation/hosting business as planned. In addition, Nocom Drift AB’s employees include some of the top talent and the company has a stable and interesting customer base. Together we are one of Sweden’s largest providers of IT operation services,” says Mats Ottosson, President of QD System AB

“We have now laid the foundation for the upcoming expansion phase and the pursuit of new and bigger transactions. The next step is to clarify our profile in the market so that we can further grow our business organically and possibly also through minor acquisitions,” says Gilbert Lövenstad, Chairman and majority owner of QD.
